As Bruce Trigger explains

in his preface, Canada in
the European Age,
1453-1919 was the first
history in which native
peoples appeared as
genuine actors in human
dramas - mainly tragedies
- instead of as part of the
flora and fauna in the
background. By stressing
the interconnections

between the grand events
of the conquest and
subjugation of the globe
by European empire
builders and the less
dramatic events in
Canada, Naylor's book led
to a fundamental
reinterpretation of
Canadian social,
economic, and political

history.

Since their arrival in Red River in 1845, the Missionary Oblates of Mary Immaculate have played an integral role in the history of Canada's North West. The Oblates followed the Hudson's Bay Company trade routes into western Canada. They believed ardently in the importance of bringing the word of Christ to natives of what - to the Oblates - was a new land. Competition

with Protestant missionaries added pressure to the missionary work of the Oblates. In recent years, the Oblates have acknowledged that their converts - radically torn from traditional native worship and spirituality - made a sometimes troubled embrace of Christianity. Guided by their vision of Christian society and norms, the Oblates went on to work with the Government of Canada to provide health care and education to treaty Indians on the

prairies. Their strong identity as both French and Catholic helped shape both native and non-native communities throughout Canada's North West.

Canada Gazette Wilfrid Laurier Univ. Press

This bibliography is the first of a series of studies about higher education in Canada sponsored by the committee on the History of Higher Education in Canada established by the National Conference of Canadian Universities. Among its nearly 4,000 entries are included the

books, pamphlets, theses, dissertations, and articles in journals and magazines which supply the context and commentary on the history of Canadian higher education. Part I of the Bibliography provides the context; our universities do not exist in a vacuum—they are part of the economic, political, religious and social life of the community. Part I, therefore, includes a section on Canadian Culture, listing histories of Canada and its provinces, of its religious and social institutions, of its art, its

economy, racial groups, relations with other countries. In order to study higher education in relation to other levels of education, another section lists works concerned with educational developments and problems at all levels. Part II lists the works bearing directly on higher education in Canada, and includes sections on History and Organization, Curriculum and Teaching, The Professor, The Student. Entries are arranged in chronological order in all sections in

order to present the progressive development of each topic, and a full Index enables easy reference by author. No distinction has been drawn between English- and French-language publications: Chemistry and Chimie are one subject. The relative proportion of English and French entries in a section is often significant as indicating differences in the frequency and importance of particular fields of study in our colleges.  Even though Physical Education is considered as a basic right of all children, views vary on what comprises quality Physical Education; Huge

differences exist between countries and regions. In this important book the situation of Physical Education is compared by means of a worldwide survey. This allows the definition of some universally accepted features and concepts, and of appropriate responses to common problems. It is the first publication to provide concentrated information on the state of PE around the world.

Education Association
 The emergence of social networks, OpenCourseWare, Massive Open Online Courses, informal remote learning and connectivist approaches to learning has made the analysis and evaluation of Digital Learning Environments more complex. Modeling these complex systems makes it possible to transcribe the phenomena observed and facilitates the study of these processes with the aid of specific tools. Once this essential step is taken, it

then becomes possible to develop plausible scenarios from the observation of emerging phenomena and dominant trends. This book highlights the contribution of complex systems theory in the study of next generation Digital Learning Environments. It describes a realistic approach and proposes a range of effective management tools to achieve it.

The purpose of this

document is to provide information on research units that are engaged in educational research in Canada. It is intended to be a quick and simple survey of research units and their current research themes. For each item, the following information is provided: institution; name of the unit; director, postal address, telephone, fax, e-mail address; number of researchers; percentage of unit's work devoted to research, percentage devoted to educational research; levels studied; funding

source; reporting; and current research priorities.

The Guises of Canadian Diversity / Les masques de la diversité canadienne IRPP

Marking 150 years since Confederation provides an opportunity for Canadian international law practitioners and scholars to reflect on Canada's rich history in international law and governance, where we find ourselves today in the community of nations, and how we might help shape a future in which Canada's rules-

based and progressive approach to international law gains ascendancy. This collection of essays, each written in the official language chosen by the authors, provides a thoughtful perspective on Canada's past and present in international law, surveys the challenges that lie before us, and offers renewed focus for Canada's pursuit of global justice and the rule of law. Part I explores the history and practice of international law, including sources of international law,

Indigenous treaties, international treaty diplomacy, domestic reception of international law, and Parliament's role in international law. Part II explores Canada's role in international law, governance and innovation in the broad fields of economic, environmental, and intellectual property law. Part III explores Canadian perspectives on developments in international human rights and humanitarian law, including judicial implementation of these

obligations, international labour law, business and human rights, international criminal law, war crimes, child soldiers, and gender. Reflections on Canada's Past, Present and Future in International Law/Réflexions sur le passé, le présent et l'avenir du Canada en droit international demonstrates the pivotal role that Canada has played in the development of international law and signals the essential contributions the country

is poised to make in the future.

Social Marketing for Public Health: Global Trends and Success Stories explores how traditional marketing principles and techniques are being used to increase the effectiveness of public health programs-around the world. While addressing the global issues and trends in social marketing, the book highlights successful health behavior change

campaigns launched by governments, by a combination of governments, NGOs, and businesses, or by citizens themselves in 15 countries of five continents. Each chapter examines a unique, current success story, ranging from anti-smoking campaigns to HIV-AIDS prev

Contemporary theatre is one of the best ways for ethno-cultural minorities to express themselves, whether they be of

indigenous origin or immigrants. It is often used to denounce social injustice and discrimination and, more generally, it helps to air questions debated in the wider community. It may also express itself thanks to the staging of collective memory, for it constitutes a privileged space for the exploration of the trauma of the past (colonial, for example), as well as providing a means of effecting the reconfiguration of a new identity, or of articulating an uneasiness about that

identity. Should minority theatre increase its visibility in relation to the mainstream, or, on the contrary, remain on the margins and assert its specificity? This question is at the centre of French-Canadian experience, for example, but also applies to other postcolonial societies, in Europe and elsewhere. In order to maintain its cultural authenticity, should this type of theatre distinguish itself from a multiculturalism that runs the risk of political and social recuperation? If it is

unable to resist the model proposed by globalization and widespread cultural dissemination, will it lose its legitimacy? Can, and should there be, a form of popular art at the service of the community? The term “minority” raises questions that will be examined by the articles collected in this volume. What is the definition of a minority? Does this term refer to experimental and avant-garde art forms as well as to ethno-cultural drama? Contemporary theatre is characterized by an aesthetics of

hybridity—in what measure is this the case for theatre outside the mainstream? The exploration of this kind of theatre necessitates an examination of the very concept of theatre per se. Since the development of the electronic media as the privileged vector of culture, has not the theatrical genre itself become a minority art form? These are some of the pressing questions that this volume will try to address, thanks to a cross-cultural, multidisciplinary approach

that aims to reveal the rich diversity of the field under study.

Annual Report UBC Press

Volume Two of this retrospective bibliography is both a continuation and an expansion of Volume One (1984). It contains references to Canadian medical-historical literature published between 1984 and 1998, and also includes much additional material published prior to 1984. Finally, it substantially enlarges the content of French-language material.

Every effort has been made to be as inclusive as possible of articles, theses, book chapters and books, both in English and in French, relating to the history of medicine. No single electronic source can replace this bibliography. The contents are divided into three sections. The first is a listing of material expressly biographical. Section two lists material under a wide variety of subject headings related to medicine, and the third is a complete listing of the authors who have

contributed these articles. Simply organized and easy to use, this bibliography will be of value to historians, archivists, librarians, and anyone interested in the history of medicine.

Les substances lipidiques ont longtemps été négligées par les physiologistes, mais des recherches épidémiologiques les ont récemment portées sur le devant de la scène, notamment au travers de leur intérêt dans les domaines de la nutrition et surtout de la santé chez l'Homme. Outre leur importance énergétique, les lipides interviennent dans de nombreux

mécanismes cellulaires dont les dérèglements peuvent conduire à des pathologies parfois graves. En effet, en plus de leur impact sur les maladies métaboliques, les systèmes cardiovasculaire et immunitaire et les processus de cancérisation, le système nerveux central peut lui aussi être altéré à des degrés divers par une carence ou un déséquilibre entre les constituants lipidiques ingérés. Après quelques rappels historiques sur la

découverte des lipides et leur utilisation, une première partie décrit les principaux lipides présents dans notre ration alimentaire. Puis, les besoins avérés ou éventuels de l'Homme en divers acides gras, stérols et vitamines appartenant au groupe des lipides, sont passés en revue. Enfin, l'impact des principaux lipides sur des pathologies naguère encore peu explorées sous cet aspect est exposé en détail. Les lipides - Nutrition et santé présente, de façon

synthétique, un très large panorama de toutes les facettes des lipides, des acides gras aux corps gras les moins abondants, mais tout aussi importants pour l'équilibre de notre organisme. Il permet aux spécialistes de revisiter les principales sources de lipides présentes dans notre alimentation en insistant sur leur production et leur composition. Cet ouvrage s'adresse aux chercheurs, médecins généralistes et spécialistes, diététiciens et étudiants évoluant dans de nombreux

domaines tels que la biologie cellulaire, la nutrition ou encore la pharmacologie.

Frontiers Media SA

Consacré à la définition

controversée de

l'expropriation indirecte

en droit international, cet

ouvrage, à travers l'exemple des réglementations environnementales, offre une analyse complète de la question et propose une lecture innovante des principes applicables à la protection des investisseurs étrangers. Drawing on the controversial definition of indirect expropriation in international law, this book, through the example of environmental regulation, provides a comprehensive analysis of this topic and offers an innovative rereading of

principles applicable to the protection of foreign investors.

Education

The essays collected here illustrate aspects of recent research conducted by graduate students in Canadian studies at various European universities. The methodological diversity displayed points to the very essence of the

culture the contributors explore - what has been commonly termed the Canadian mosaic or, more recently, the Canadian kaleidoscope (Janice Kulyk-Keefer). In analysing the many facets of this mosaic, the numerous images of this kaleidoscope, the contributors offer fresh and youthful reappraisals of traditional visions of Canadianness. *International Comparison of Physical Education* IIGR, Queen's University
A new, accessible guide to French B from IB experts

and native speakers, French B for the IB Diploma responds to teacher needs by providing texts and skills practice at the right level for all students for all core and optional topics. Clear learning pathways provide routes through the book for both Standard and Higher Level students ensuring maximum language progression. This Student Book: - develops text handling skills for Paper 1 through carefully crafted reading tasks based around the main text types - provides

plenty of writing practice that mirrors the skills and styles needed for Paper 2 (written production) - offers opportunities to encourage speaking skills with a wealth of visual stimulus - promotes global citizenship and an appreciation of the Francophone world through a wide range of cultural material and questioning - signposts links and references to Theory of Knowledge Also available: French B for the IB Diploma Dynamic Learning (ISBN 9781471804731) Teacher

planning, student resources, assessment material and audio, all easily accessible, anytime, anywhere. French B for the IB Diploma Dynamic Learning Whiteboard Edition (ISBN 9781471804212). [Cultural Regulation in Canada](#) Jones & Bartlett Learning This book brings together the work of over twenty-five researchers to provide a comparative and empirically rich portrait of community forestry policy and

practice in Canada. Tackling all forestry regions from Newfoundland to British Columbia, it unearths the history of community forestry across the nation, demonstrating strong regional differences tied to patterns of policy-making and cultural

traditions. Case studies reveal innovative practices in governance and ecological management but also uncover challenges related to government support and market access. This book also considers the future of the sector, including the role

of institutional reform, multiscale networks, and adaptive management strategies.
