Designer Natalie Chanin blends embroidery and hand-sewing techniques with her own personal story in this empowering guide for all who love stitching and handcraft *Embroidery: Threads and Stories from Alabama Chanin and The School of Making* mixes lessons in sewing, design, and

embroidery with Natalie Chanin's engaging, personal story of the evolution of Alabama Chanin and the indelible mark the techniques she pioneered and the company she founded have made on the sewing and fashion industry. Chapters explore design-related themes—craft, technique, relationship, repeat, and color—through images, instruction, and stories from Chanin about her life, Alabama Chanin, and the evolving view of craft and hand-sewing in the modern world. The book also explores how sewing and embroidery relate to wider concerns of sustainability, community, and women's empowerment. As makers, we tend to learn different stitches over time without thinking much about how they relate to one another. Embroidery challenges us to go deeper by examining the history of a beloved company and cherished pastime.

As makers, we tend to learn different stitches over time without thinking much about how they relate to one another. But when Natalie Chanin and her Alabama Chanin and The School of Making teams began to look at needlework closely, they realized all stitches are based on geometric grid systems—and by using grids as guides, they could make learning stitches, even seemingly elaborate ones, as easy as child's play. In *The Geometry of Hand-Sewing* Chanin presents their breakthrough method, featuring illustrated instructions (for both right- and left-handed stitchers) for more than 100 stitches—from the most basic straight and chain to the more fanciful feather and herringbone; photos of both right and wrong sides; and guidelines for modifying stitches to increase one's repertoire further. To simplify learning, the book also offers downloads for two stitching cards with the grids on which every stitch in the book is based. These printable cards can be used as stencils for transferring grids to fabric.
