"This book focuses on human, operational, managerial, and strategic organizational issues in e-banking"--Provided by publisher.

Improving Knowledge Discovery through the Integration of Data Mining Techniques IGI Global

Volume 22, Fintech, Pandemic, and the Financial System, examines systemic challenges faced by a wide range of financial market participants and the continued disruptions introduced by financial innovations (Fintech).

The 2015 Brookings Financial and Digital Inclusion Project Report John Wiley & Sons

The Encyclopedia of Social Media and Politics explores how the rise of social media is altering politics both in the United States and in key moments, movements, and places around the world. Its scope encompasses the disruptive technologies and activities that are changing basic patterns in American politics and the amazing transformations that social media use is rendering in other political systems heretofore resistant to democratization and change. In a time when social media are revolutionizing and galvanizing politics in the United States and around the world, this encyclopedia is a must-have reference. It reflects the changing landscape of politics where old modes and methods of political communication from elites to the masses (top down) and from the masses to elites (bottom up) are being displaced rapidly by social media, and where activists are building new movements and protests using social media to alter mainstream political agendas. Key Features This three-volume A-to-Z encyclopedia set includes 600 short essays on high-interest topics that explore social media's impact on politics, such as "Activists and Activism," "Issues and Social Media," "Politics and Social Media," and "Popular Uprisings and Protest." A stellar array of world renowned scholars have written entries in a clear and accessible style that invites readers to explore and reflect on the use of social media by political candidates in this country, as well as the use of social media in protests overseas Unique to this book is a detailed appendix with material unavailable anywhere else tracking and illustrating social media usage by U.S. Senators and Congressmen. This encyclopedia set is a must-have general, non-technical resource for students and researchers who seek to understand how the changes in social networking through social media are affecting politics, both in the United States and in selected countries or regions around the world.

The New Legal Framework for E-Commerce in Europe Wiley-Interscience

Continuous improvements in emerging economies have created more opportunities for industrialization and rapid growth. This not only leads to higher standards in accounting and security regulations, but it increases the overall marketing efficiency. Promotional Strategies and New Service Opportunities in Emerging Economies is a key resource in the field of service marketing and promotions, service innovations, and branding in developing countries. Highlighting multidisciplinary studies on self-service technologies, sustainable consumption, and customer relation management, this publication is an ideal reference source for policy makers, academicians, practitioners, researchers, students, marketers, and government officials actively involved in the services industry.

#1 NEW YORK TIMES BESTSELLER • NAACP IMAGE AWARD WINNER • A dramatic expansion of a groundbreaking work of journalism, The 1619 Project: A New Origin Story offers a profoundly revealing vision of the American past and present. FINALIST FOR THE KIRKUS PRIZE • ONE OF THE BEST BOOKS OF THE YEAR: The Washington Post, NPR, Esquire, Marie Claire, Electric Lit, Ms. magazine, Kirkus Reviews, Booklist In late August 1619, a ship arrived in the British colony of

Virginia bearing a cargo of twenty to thirty enslaved people from Africa. Their arrival led to the barbaric and unprecedented system of American chattel slavery that would last for the next 250 years. This is sometimes referred to as the country's original sin, but it is more than that: It is the source of so much that still defines the United States. The New York Times Magazine's award-winning "1619 Project" issue reframed our understanding of American history by placing slavery and its continuing legacy at the center of our national narrative. This new book substantially expands on that work, weaving together eighteen essays that explore the legacy of slavery in present-day America with thirty-six poems and works of fiction that illuminate key moments of oppression, struggle, and resistance. The essays show how the inheritance of 1619 reaches into every part of contemporary American society, from politics, music, diet, traffic, and citizenship to capitalism, religion, and our democracy itself. This is a book that speaks directly to our current moment, contextualizing the systems of race and caste within which we operate today. It reveals long-glossed-over truths around our nation's founding and construction—and the way that the legacy of slavery did not end with emancipation, but continues to shape contemporary American life. "This book provides theoretical and empirical information related to the planning and execution of IT projects aimed at serving indigenous people. It explores cultural concerns with IT implementation, including language issues & questions of cultural appropriateness"--Provided by publisher.

Fintech, Pandemic, and the Financial System GRIN Verlag

Information and insight into the legal, regulatory, legislative and policy issues in electronic banking and commerce.

Project planning and the performance of information technology projects. Limits and possibilities SAGE Publications

This collection of essays by well known specialists in e-commerce and Internet law, drawn from both academe and practice, analyses recent crucial legislation which has created, for the first time, a legal regime governing European electronic commerce. The central focus is on the European Electronic Commerce Directive and its implementation in the UK since August 2002. The E-Commerce Directive develops a distinctive European strategy for regulating and promoting on-line business and the information society. Areas of the Directive analysed include contracting on-line, Internet service provider liability, consumer privacy including spam and 'cookies', country of origin regulation, and on-line alternative dispute resolution (ODR). Further chapters move beyond the Directive to discuss other important new laws in this domain, including the Privacy and Electronic Communications Directive, the Distance Selling Directives, the Electronic Money Directive, the Lawful Business regulations on employee surveillance, the disability discrimination rules affecting websites and the extension of VAT to on-line transactions. Both the European framework and the rules as implemented in the UK are examined and critiqued for how well they meet the needs of business and consumers.

Banking and Finance on the Internet GRIN Verlag

The paper finds that while there are important regional and national differences, countries are broadly embracing the opportunities of fintech to boost economic growth and inclusion, while balancing risks to stability and integrity.

Environmental Change and Security Project Report IGI Global

A systematic assessment of the impact of public access to computers and the Internet, with findings from developing countries in South America, Asia, and Africa. Shared public access to computers and the Internet in developing countries is often hailed as an effective, low-cost way to share the benefits of digital technology. Yet research on the economic and social effects of public access to computers is lacking. This volume offers the first systematic assessment of the impact of shared public access in the developing world, with findings from ten countries in South America, Asia, and Africa. It provides evidence that the benefits of diversified participation in digital society go beyond providing access to technology. Public access venues—most often Internet cafés in cities and state-run telecenters in rural areas—are places for learning, sharing, working, empowerment and finding opportunities. The book documents the impact of public access on individuals, on society and networks, and on women. Chapters report findings and examine policy implications of research on such topics as users' perceptions of the benefits of Internet café use in Jordan; ICT job training in Rwanda; understanding user motivations and risk factors for overuse and Internet addiction in China; the effect of technology use on social inclusion among low-income urban youth in Argentina; productive uses of technologies by grassroots organizations in Peru; use of technology by migrant ethnic minority Burmese women in Thailand to maintain ties with their culture and their family and friends; and women's limited access to the most ubiquitous type of venue, cybercafés, in practically all countries studied—and quite severely in some places, e.g. Uttar Pradesh, India. Contributing Editors Erwin A. Alampay, Roxana Barrantes Cáceres, Hernan Galperin, Abiodun Jagun, George Sciadas, Ramata Molo Thioune, Kentaro Toyama Chapter authors Ali Farhan AbuSeileek, Carolina Aguerre, Oluwasefunmi Tale Arogundade, Nor Aziah Alias, Sebastián Benítez Larghi, Jorge Bossio, Juan Fernando Bossio, Marina Laura Calamari, Nikos Dacanay, Jean Damascène Mazimpaka, Laurent Aristide Eyinga Eyinga, Mary Luz Feranil, Ariel Fontecoba, Omar Fraihat, Martin S. Electronic banking enhancing federal oversight of Internet banking activities : report to the chairman, Committee on Banking and Financial Services, House of Representatives. International Monetary Fund

Discusses federal oversight of depository institutions' Internet banking activities. The objectives of this report are to (1) describe the risks posed by Internet banking & the extent of any industrywide Internet banking-related problems, (2) assess the methods used by regulators to track depository institutions' plans to provide Internet banking services, (3) determine how regulators examined Internet banking activities, & (4) determine the extent to which regulators examined firms providing Internet banking support services to depository institutions.

Kerala Development Report DIANE Publishing

Full of data on various sectors and issues--among them finance, tourism, foreign trade, agriculture, and governance--this report on the state of Kerala is designed to benefit businesses, NGOs, and policy makers. While Kerala has a strong economy and is India's most literate state, areas such as human rights and the treatment of women and minorities leave room for improvement. This extensive reference discusses the constraints and challenges faced by Kerala and provides a blueprint for its socioeconomic progress.

The Global Findex Database 2017 One World

Mary J. Cronin, a leading expert on using the Internet for business, provides an overview of the impact of the Internet on banking, and offers her vision of the future of electronic banking.

Global Information Technologies: Concepts, Methodologies, Tools, and Applications Cambridge University Press

This book empowers readers to know the thought-provoking field of software effort estimation. It discusses how requirement change effort estimation using algorithmic and impact analysis techniques is used to optimize the estimation accuracy prediction of software development effort. It is a worthy read for researchers and practitioners to estimate the change effort required to develop traditional and agile-based software systems.

Electronic Banking Law and Commerce Report IGI Global

Doctoral Thesis / Dissertation from the year 2005 in the subject Law - Comparative Legal Systems, Comparative Law, grade: 70/100, Stellenbosch University, course: LL M International Trade Law, 61 entries in the bibliography, language: English, abstract: This paper focuses upon legal issues arising in the field of electronic or Internet banking. The overview of previous developments in this field and of types of e-banks will be given. It analyses existing and potential problems mainly connected with cross-border services. The issue of data protection, the right to provide services and the advertisement of e-banking services will be especially examined. The paper will evaluate current regulation and it will be shown, that there are either lacunae in such legislation, in the alternative, several important issues are left unanswered, possibly severely hindering the further progress of Internet banking. This dissertation suggests that further developing of both international and domestic legislation is crucial for banks to be able to make use of the possibilities offered by the Internet.

Electronic Banking IGI Global

ABOUT THE BOOK Finland was the first country in the world to have taken a lead in E-banking. In India, it was ICICI Bank which initiated E-banking as early as 1997 under the brand name Infinity. Electronic banking (E-banking) is a generic term encompassing internet banking, telephone banking,

mobile banking etc. In other words, it is a process of delivery of banking services and products through electronic channels such as telephone, internet, cell phone etc. The concept and scope of E-banking is still evolving. E-banking facilitates an effective payment and accounting system thereby enhancing the speed of delivery of banking services considerably. While E-banking has improved efficiency and convenience, it has also posed several challenges to the regulators and supervisors. Several initiatives taken by the Government of India as well as the Reserve Bank of India (RBI) have facilitated the development of E-banking in India. The Government of India enacted the IT Act, 2000 with effect from October 17, 2000, which provides legal recognition to electronic transactions and other means of electronic commerce. The RBI has been gearing up to upgrading itself as a regulator and supervisor of the technologically dominated financial system. It issued guidelines on risks and control in computer and telecommunication system in February 1998 to all the banks advising them to evaluate the risks inherent in the systems and put in place adequate control mechanisms to address these risks, which can be broadly put under three heads, viz. IT environment risks, IT operations risks and product risks. The existing regulatory framework over banks has also been extended to E-banking. It covers various issues that fall within the framework of technology, security standards and legal and regulatory issues. This book contains 12 articles by scholars specialising in the area of banking. It will be useful for all those who want to understand recent technological developments in Indian banking.

International Business Finance Springer Science & Business Media

Sams Teach Yourself e-Banking Today is a comprehensive tutorial of this emerging online trend. The reader will be taught the best practices of online banking. They will learn how to compare services and fees and determine which online bank is right for them. The book will explain the security risks of online banking in clear, friendly terms. It will teach the reader how to take control of their money by employing the information available on the Internet. The book will also show the reader how to link popular software packages like Quicken and MS Money to their online bank.

Sams Teach Yourself E-Banking Today World Bank Publications

Data warehousing is an important topic that is of interest to both the industry and the knowledge engineering research communities. Both data mining and data warehousing technologies have similar objectives and can potentially benefit from each other's methods to facilitate knowledge discovery. Improving Knowledge Discovery through the Integration of Data Mining Techniques provides insight concerning the integration of data mining and data warehousing for enhancing the knowledge discovery process. Decision makers, academicians, researchers, advanced-level students, technology developers, and business intelligence professionals will find this book useful in furthering their research exposure to relevant topics in knowledge discovery.

The 2015 Brookings Financial and Digital Inclusion Project (FDIP) Report and Scorecard evaluate access to and usage of affordable financial services across 21 geographically and economically diverse countries. The 2015 FDIP Report and Scorecard seek to answer a set of fundamental questions about today's global financial inclusion efforts, including: 1) Do country commitments make a difference in progress toward financial inclusion?; 2) To what extent do mobile and other digital technologies advance financial inclusion?; and 3) What legal, policy, and regulatory approaches promote financial inclusion? John D. Villasenor, Darrell M. West, and Robin J. Lewis analyzed the financial inclusion landscape in Afghanistan, Bangladesh, Brazil, Chile, Colombia, Ethiopia, India, Indonesia, Kenya, Malawi, Mexico, Nigeria, Pakistan, Peru, the Philippines, Rwanda, South Africa, Tanzania, Turkey, Uganda, and Zambia. Countries received scores and rankings based on 33 indicators spanning four dimensions: country commitment, mobile capacity, regulatory environment, and adoption of traditional and digital financial services. The authors' analysis provides several takeaways with respect to expanding financial inclusion across diverse cultural, economic, and political contexts: · Country commitment is fundamental. · Movement toward digital financial services will accelerate financial inclusion. · Geography generally matters less than policy, legal, and regulatory changes, although some regional trends in terms of financial services provision are evident. · Central banks, ministries of finance, ministries of communications, banks, nonbank financial providers, and mobile network operators play major roles in achieving greater financial inclusion. · Full financial inclusion cannot be achieved without addressing the financial inclusion gender gap. This year's Report and Scorecard are the first of a series of publications intended to provide policymakers, the private sector, nongovernmental organizations, and the general public with information that can help improve financial inclusion in these countries and around the world.

Legal Aspects of Internet Banking Related to International Business Transactions UNESCO

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.
