*A Higher Bid* Rowman  
& Littlefield  
A fast-paced adventure  
across four continents

(and two universes),  
aiming to answer a lot  
of questions. What  
would an ordinary man  
do if he suddenly gains  
the ultimate  
knowledge? Will he use  
it for his own benefit or

the common good? Are we alone in the universe? And is the universe alone? Who made it? Is there a grain of truth in conspiracy theories? Who hushed up a number of inventions and why? Does the power of thought know any limits? Questions. Always more than the answers.

#### Climate Change and Renewable Energy

"O'Reilly Media, Inc." From 9/11 to Charlie Hebdo along with Sony-pocalypse and DARPA's \$2 million Cyber Grand Challenge, this book examines counterterrorism and cyber security history, strategies and technologies from a thought-provoking approach that encompasses personal experiences,

investigative journalism, historical and current events, ideas from thought leaders and the make-believe of Hollywood such as 24, Homeland and The Americans. President Barack Obama also said in his 2015 State of the Union address, "We are making sure our government integrates intelligence to combat cyber threats, just as we have done to combat terrorism. In this new edition, there are seven completely new chapters, including three new contributed chapters by healthcare chief information security officer Ray Balut and Jean C. Stanford, DEF CON speaker Philip Polstra and security engineer and Black Hat speaker Darren Manners, as well as

new commentaries by communications expert Andy Marken and DEF CON speaker Emily Peed. The book offers practical advice for businesses, governments and individuals to better secure the world and protect cyberspace. *Storing Digital Binary Data in Cellular DNA* Taylor & Francis

A discussion of the rapidly growing field, from a thinker at the forefront of research at the interface of technology and the humanities, this is a must-read for anyone interested in contemporary developments in Continental philosophy and philosophy of technology. Philosophy of technology regularly draws on key thinkers in the Continental tradition, including

Husserl, Heidegger, and Foucault. Yet because of the problematic legacy of the 'empirical turn', it often criticizes 'bad' continental tendencies - lyricism, pessimism, and an outdated view of technology as an autonomous, transcendental force. This misconception is based on a faulty image of Continental thought, and in addressing it Smith productively redefines our concept of technology. By closely engaging key texts, and by examining 'exceptional technologies' such as imagined, failed, and impossible technologies that fall outside philosophy of technology's current focus, this book offers a practical guide to thinking about and

using continental philosophy and philosophy of technology. It outlines and enacts three key characteristics of philosophy as practiced in the continental tradition: close reading of the history of philosophy; focus on critique; and openness to other disciplinary fields. Smith deploys the concept of exceptional technologies to provide a novel way of widening discussion in philosophy of technology, navigating the relationship between philosophy of technology and Continental philosophy; the history of both these fields; the role of imagination in relation to technologies; and the social function of technologies themselves.

### **We Are Cuba!**

Springer Nature  
The book is dealing with recent progress in human-computer interaction (HCI) related to geographic information science (GIS). The Editorial starts with an overview about the evolution of the Internet and first HCI concepts and stimulates recent HCI developments using 3D and 4D apps, running on all mobile devices with OS Android, iOS, Linus, and Windows. Eight research articles present the state-of-the-art in HCI-GIS-related issues, starting with gender and age differences in using indoor maps via the estimation of building heights from space to an efficient visualization method for polygonal data with dynamic simplification.

The review article deals with progress and challenges on entity alignment of geographic knowledge bases.

### Namibia on Wheels

Trans Tech Publications Ltd

The extraordinary account of the Cuban people's struggle for survival in a post-Soviet world In the aftermath of the fall of the Soviet Union, Cuba faced the start of a crisis that decimated its economy. Helen Yaffe examines the astonishing developments that took place during and beyond this period. Drawing on archival research and interviews with Cuban leaders, thinkers, and activists, this book tells for the first time the remarkable story of how Cuba survived

while the rest of the Soviet bloc crumbled. Yaffe shows how Cuba has been gradually introducing select market reforms. While the government claims that these are necessary to sustain its socialist system, many others believe they herald a return to capitalism. Examining key domestic initiatives including the creation of one of the world's leading biotechnological industries, its energy revolution, and medical internationalism alongside recent economic reforms, Yaffe shows why the revolution will continue post-Castro. This is a fresh, compelling account of Cuba's socialist revolution and the challenges it faces today.

A collection of 16 fascinating scientific and technical projects to build with parts from the LEGO MINDSTORMS EV3 robotics set and other components. A great addition to any STEM curriculum or home library. High Tech LEGO® hijacks the MINDSTORMS® EV3 revolution, showing you how to build creative technical inventions with practical applications. You'll learn to build a dynamic array of working devices for outdoor research, home security, spycraft, and more. Among the book's 16 fascinating projects you'll find a motion-activated animal cam,

a Morse code transmitter, a laser security fence, a motion-sensing radar detector, an automated insect trapper, and a heat-seeking infrared cannon. Welcome to a whole new world of building! Every project brings together science, mechanics, electronics, optics, and software to create complex instruments for studying and measuring the world around you, all while maintaining the playfulness of LEGO. Each easy-to-follow model combines illustrated instructions with step-by-step guidance on the engineering methods at play. As you build, you'll learn: "Illegal" modding techniques (that may include drilling, cutting and

soldering -- Shh!)  
 Different ways to work  
 with diode laser  
 modules Tricks for  
 modifying EV3 sensors  
 and motors The joy of  
 hacking LEGO light  
 bricks to make a  
 flickering fireplace How  
 to use MINDSTORMS to  
 build your own  
 contraptions!  
 Experiment on your  
 own, and expand on  
 your finished creations.  
 Make a few  
 adjustments so the  
 Critter Cam triggers an  
 alarm to scare away  
 pests, or modify the  
 Doppler radar to detect  
 flammable gases. The  
 possibilities are  
 endless!

Namibia - a self-drive destination of extreme landscapes offering

empty roads and an average of 300 days sunshine. Around every corner it holds delights for all age ranges and driving abilities with itineraries encompassing majestic sand dunes, fascinating wildlife, rugged mountain passes alongside water sports, adrenalin-soaked activities, comfortable lodges and a range of camping options including the freedom and solitude of wild camping.

Namibia On Wheels has been compiled from the authors' vast personal experience, both good and bad, of traversing the length and breadth of Namibia. This first hand knowledge has been collated to produce a unique comprehensive guide offering everyone the

chance to enjoy this fantastic country safely and to its fullest. It will guide you through the whole process of planning a never to be forgotten road trip in this safe and increasingly popular, but relatively unknown, destination. Whether scenery, deserts and mountains, culture, adventure, conservation or wildlife captivates you, Namibia offers it all and this book will point you in the right direction. It contains rarely found information from itinerary planning, vehicle hire process and what to look for in a rental 4x4, through to subjects as diverse as health, money, cross border procedures, taking your own vehicle, motorcycling,

photography, on the road advice and eco travel. An array of photographs showing the diversity of Namibia's scenery and wildlife to whet anyone's appetite can be found on the attached website, which also offers downloadable itineraries and lists to help with packing, first aid kits, shopping and emergency help. As an e-book, this publication will be an invaluable planning and touring aid for international visitors to take with them on their trip to Namibia. "Smart people learn from their mistakes. But the real smart ones learn from the mistakes of others" Brandon Mull  
*The Garden* Springer  
 Building on the success of the first edition and bringing together

contributions from a range of experts in the field, the second edition of this guide to research on wild primates covers the latest advances in the field, including new information on field experiments and measuring behaviour. It provides essential information and advice on the technical and practical aspects of both field and laboratory methods, covering topics such as ethnoprimateology; remote sensing; GPS and radio-tracking; trapping and handling; dietary ecology; and non-invasive genetics and endocrinology. This integrated approach opens up new opportunities to study the behavioural ecology of some of the most endangered primates and to collect

information on previously studied populations. Chapters include methodological techniques; instructions on collecting, processing and preserving samples/data for later analysis; ethical considerations; comparative costs; and further reading, making this an invaluable tool for postgraduate students and researchers in primatology, behavioural ecology and zoology. Digital War Troubador Publishing Ltd Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-

enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish.

Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

*PC World* SAGE

Digital War offers a comprehensive overview of the impact of digital technologies upon the military, the media, the global public and the concept

of 'warfare' itself. This introductory textbook explores the range of uses of digital technology in contemporary warfare and conflict. The book begins with the 1991 Gulf War, which showcased post-Vietnam technological developments and established a new model of close military and media management. It explores how this model was reapplied in Kosovo (1999), Afghanistan (2001) and Iraq (2003), and how, with the Web 2.0 revolution, this informational control broke down. New digital technologies allowed anyone to be an informational producer leading to the emergence of a new mode of 'participative war', as seen in Gaza,

Iraq and Syria. The book examines major political events of recent times, such as 9/11 and the War on Terror and its aftermath. It also considers how technological developments such as unmanned drones and cyberwar have impacted upon global conflict and explores emerging technologies such as soldier-systems, exo-skeletons, robotics and artificial intelligence and their possible future impact. This book will be of much interest to students of war and media, security studies, political communication, new media, diplomacy and IR in general.

Transform fundraising events into long-term revenue with expert auction advice. A Higher Bid is the nonprofit school and organization guide to planning and executing more exciting, more lucrative special event fundraisers. In this book, award-winning consultant, fundraiser, speaker, and professional auctioneer Kathy Kingston shares her proprietary and proven approaches to audience development, board empowerment, leadership succession, guest cultivation and engagement, and donor development. You'll learn how live auctions, special appeals, innovative icebreakers, silent auctions, and new technologies can help increase revenue, and how to execute these

events in a way that translates to a stronger donor base for long-term giving. Kingston describes how to match the guest list and catalog for better results, and reveals the strategies professional auctioneers use to curate the right auction items and discover the right people to generate optimum revenue and engage donors. This book offers a fresh approach to fundraising, showing you how charity benefit auctions can be made a centerpiece of fundraising special events to drive both short- and long-term fundraising goals while providing a fun and inspiring opportunity to generate awareness and keep supporters excited.

about the mission. Using Kingston's proven framework, you'll learn effectiveness to: Strategically increase high-profit revenue streams Increase your organization's donor base Empower the board toward efficiency and productivity Engage supporters more deeply and keep them invested Donors are the lifeblood of any nonprofit organization, and sustainable revenue depends upon their high engagement and willingness to give. Well-executed benefit and charity auctions have proven to be effective fundraisers for nonprofits, associations, and schools of all types, and A Higher Bid is the expert guide to optimizing these special events for

maximum impact. *Bush task group report on regulation of financial services* Bloomsbury Publishing Volume is indexed by Thomson Reuters BCI (WoS). **High-Tech LEGO Projects** Routledge

This textbook for courses in Embedded Systems introduces students to necessary concepts, through a hands-on approach. It gives a great

introduction to FPGA-based microprocessor system design using state-of-the-art boards, tools, and microprocessors from Altera/Intel® and Xilinx®. HDL-based designs (soft-core), parameterized cores (Nios II and MicroBlaze), and ARM Cortex-A9 design are discussed, compared and explored using many hand-on designs projects. Custom IP for HDMI coder, Floating-point operations, and FFT bit-swap are developed, implemented, tested and speed-up is measured. Downloadable files include all design examples such as basic processor synthesizable code for Xilinx and Altera tools for PicoBlaze, MicroBlaze, Nios II and

ARMv7 architectures in VHDL and Verilog code, as well as the custom IP projects. Each Chapter has a substantial number of short quiz questions, exercises, and challenging projects. Explains soft, parameterized, and hard core systems design tradeoffs; Demonstrates design of popular KCPSM6 8 Bit microprocessor step-by-step; Discusses the 32 Bit ARM Cortex-A9 and a basic processor is synthesized; Covers design flows for both FPGA Market leaders Nios II Altera/Intel and MicroBlaze Xilinx system; Describes Compiler-Compiler Tool development; Includes a substantial number of Homework's and FPGA exercises and design projects in each

chapter.
