Excerpt from *Blind Workers in U. S. Industries: Photographs and Letters From Their Employers* We are somewhat familiar with the statement that agencies for the blind find that employers refuse in some instances to cooperate in the employment of the blind on the basis that private insurance companies will not permit the absorption of handicapped workers. It is rather surprising to find that some few employers attempt to justify their refusals to employ the handicapped by placing the onus upon private insurance. You correctly state the situation that there is nothing in any policy of workmen's compensation insurance which interferes with the proper placing of blind persons in industry. Not only is there nothing in the insurance contract itself that limits an employer in the right of selecting blind or otherwise handicapped persons for employment in appropriate fields where they are not only not placed in jeopardy to themselves, but are not a menace to their fellow-workers, but there is nothing in any formula of premium rates for such insurance that takes account of the age or the physical handicap of any employee. I am very much interested in the statements contained in your letter with respect to the extreme care exercised by your Service in making surveys of plants and processes before undertaking to place in employment a blind person and so fully safeguarding him against injury to himself or injury to another. I am sure that the efforts you are making are very much worthwhile and should be effective in a humane field and at this particular time should add to the manpower of the nation. In the most comprehensive work on the subject published to date, McCabe presents a thorough analysis of internal dispute resolution systems in 78 of the nation's leading nonunion companies. The study's primary focus is on the procedural requirements involved in processing employee complaints for companies desiring to establish or improve internal grievance resolution programs. Three major types of procedures are examined in depth: nonunion grievance arbitration systems, nonunion internal tribunals and peer review systems, and nonunion open-door policies and formal appeal systems. McCabe's organizing precept is the belief that it is always in management's own self interest to recognize the need for sound and equitable nonunion complaint and grievance procedures. Following his analysis of complaint procedures as stipulated in the employee relations manuals of the 78 companies under study, McCabe appraises the effectiveness of these procedures in actual practice. He demonstrates that in order to be successful, each company must tailor an

individualized package of dispute resolution techniques to fit its own corporate philosophy of employer-employee relations. A comprehensive literature review and a bibliography for both practitioners and scholars of strategic human resources management complete this definitive study of dispute resolution in nonunion settings.

Even in countries which regard themselves as model democracies, such as the United States of America, the situation at the workplace may be entirely different with regard to the basic freedoms and equal treatment. In the USA, which is a genuine democracy in a political sense, the importance which is attached to democratic values is not always apparent in the codes of conduct in American enterprises and organizations. The degree to which democratic notions are put into practice in the industrial world is the basic theme of this 28th Bulletin entitled Employee Rights and Industrial Justice.
