Drug Prohibition and Policy Politics Howard Fertig Pub

Throughout history, the powerful have created laws, developed agencies to enforce those laws, and established institutions to punish lawbreakers. Maintaining the social order to their advantage resulted in the systematic repression of disadvantaged groups—the dangerous classes. The third edition retains a historical approach to exploring patterns of social control and, through current examples, demonstrates how those strategies continue today. The authors trace the roots of race, class, and gender bias in how laws are written, interpreted, and applied. The management of dangerous classes is not a recent phenomenon; there is a long history of keeping those who derive the least advantage from the status quo (and therefore pose the greatest threat) under control. There was and is one system of justice for the privileged and a very different system for the less privileged. The criminal justice system—from the law to daily operations of the police, courts, and

corrections—generally comes down hardest on those with the least amount of power and influence and is the most lenient with those with the most power and influence. The book raises critical questions. What is a crime? What is law? Whose interests are served by the law and the criminal justice system? What patterns are repeated generation after generation? How does the criminal justice system relate to larger issues such as social inequality, social class, race, and gender? Contemplation of these topics contributes to informed public dialogue and careful deliberation about the present state and the future of criminal justice.

Barak provides the first integrated analysis of crime, criminal justice, and criminology through a global lens, revealing the importance of a global perspective for the study of crime and justice in

the 21st century. While moving seamlessly from the micro bio-psychological, interactive-social process to the macro cultural-structural forces that shape crime and our responses to it, the author presents the reader with a feast of the latest criminological ideas in this sumptuous tome.

This book presents the new Precariat – the rapidly growing number of people facing lives of insecurity, on zero hours contracts, moving in and out of jobs that give little meaning to their lives. The delivery driver who brings your packages, the uber driver who gets you to work, the security guard at the mall, the carer looking after our elderly...these are The Precariat. Guy Standing investigates this new and growing group, finding a frustrated and angry new underclass who are often ignored by politicians and economists. The rise of zero hours contracts, encouraged by fat cat corporations as risk-free employment, and by silicon valley as a way of outsourcing costs and responsibility, has been exacerbated by the COVID pandemic. At the same time, in its experience of lockdown, the western world is realizing the true value of these nurses, carers and key workers. The answer? The return of income security and meaningful work - the principles 20th century capitalism was built on. By making the fears and desires of the Precariat central to economic

thinking. Standing shows how concepts like Basic Income are not just desirable but inevitable, and plots the way to a better future.

This book offers the first detailed study of the essential relationship between thought reform and the "dangerous classes"--The prostitutes, beggars, petty criminals, and other "lumpenproletarians" the Communists saw as a threat to society and the revolution. Aminda Smith takes readers inside early-PRC reformatories, where the new state endeavored to transform "vagrants" into members of the laboring masses. As places where "the people" were literally created, these centers became testing grounds for rapidly changing ideas and experiments about thought reform and the subjects they produced. Smit.

Read the Authors' Op-Ed on the Seattle Post-Intelligencer Sin No More offers a vivid examination of some of the most morally and politically disputed issues of our time: abortion, gay rights, assisted suicide, stem cell research, and legalized gambling. These are moral values issues, all of which are hotly, sometimes violently, contested in America. The authors cover these issues in depth, looking at the nature of efforts to initiate reforms, to define constituencies, to mobilize resources, to frame debates, and to shape public opinion—all in an effort to achieve social change, create, or re-write

legislation. Of the issues under scrutiny only legalized gambling has managed to achieve widespread acceptance despite moral qualms from some. Sin No More seeks to show what these laws and attitudes tell us about Americans' approach to law and morality, and about our changing conceptions of sin, crime and illegality. Running through each chapter is a central tension: that American attitudes and laws toward these victimless crimes are going through a process of normalization. Despite conservative rhetoric the authors argue that the tide is turning on each of these issues, with all moving toward acceptance, or decriminalization, in society. Each issue is at a different point in terms of this acceptance, and each has traveled different roads to achieve their current status.

Bringing together a range of leading social scientists and criminologists, this volume explores a number of key themes raised by the work of Robert Reiner. Arguably the leading policing scholar of his generation, Reiner's work over some 40 years has ranged broadly in this field, taking in the study of police history, culture, organisation, elites and relationships with the media. Always carefully situated within an analysis of the changing socio-political circumstances of policing and crime control, Robert Reiner's scholarship has been path-breaking in its impact. The 13 original essays in this volume are testament to Reiner's influence. Although reflecting the primarily British bent within his work, the essays also draw on contributors from Australia, Europe, South Africa and the United States to explore some of the leading debates of the moment. These include, but are not limited to, the impact of neo-liberalism on crime control and the challenges for modern social democracy; police culture, equality and political economy; new media and the future of policing; youth, policing and democracy, and the challenges and possibilities posed by globalisation in the fields of policing and security.

Violence, Conflict, and World Order: Critical Conversations on State-Sanctioned Justice examines the interpersonal, institutional, and structural relations of injustice and violence, both domestically and globally, through a series of dynamic conversations that are rich with personal and passionate prose, gritty and grounded questioning, and, in several instances, spirited and lively debate. These conversations are attentive not only to the areas of cultural studies and social science in general, but also to the studies of criminology, criminal justice, and public policy in particular.

A Treatise on State and Federal Control of Persons and Property in the United States Federation Press

This book covers the history of criminal justice from a critical perspective and explores the historical biases of the criminal justice system. The overall theme of this book is that both the making of laws and the interpretation and application of these laws throughout the history of the criminal justice system has, historically, been class, gender, and racially biased. Moreover, one of the major functions of the criminal justice system has been to control those from the most disadvantaged sectors of the population, that is, the "dangerous classes." This theme is explored using a historical model, tracing the development of criminal law through the development of the police institution, the juvenile justice system, and the prison system. For anyone interested in the history of criminal justice.

This book examines the nature of imprisonment in the U.S. warehouse prisons through a study of Solano State Prison, a new California middle-range institution, where new technologies and prison regimes are being used to control up to 6,000 inmates. These inmates are crowded in a small

space, with little access to rehabilitative and recreational programs. Control is accomplished through the physical design of the prison, the use of surveillance technology, the rigid enforcement of extensive rules, and the possibility of transferring troublesome prisoners to supermax prisons. The book identifies harm that this kind of prison experience imposes on individuals, and looks at the difficulties ex-inmates have in adjusting after release.
