Anarchist, journalist, drama critic, advocate of birth control and free love, Emma Goldman was the most famous—and notorious—woman in the early twentieth century. This abridged version of her two-volume autobiography takes her from her birthplace in czarist Russia to the socialist enclaves of

Manhattan's Lower East Side. Against a dramatic backdrop of political argument, show trials, imprisonment, and tempestuous romances, Goldman chronicles the epoch that she helped shape: the reform movements of the Progressive Era, the early years of and later disillusionment with Lenin's Bolshevik experiment, and more. Sounding a call still heard today, *Living My Life* is a riveting account of political ferment and ideological turbulence. First time in Penguin Classics Condensed to half the length of Goldman's original work, this edition is accessible to those interested in the activist and her extraordinary era *Cartas desde el*

*Maltrato* Orbis Books Alexander Mackenzie was the first European to complete a land crossing of the continent of America north of Mexico, preceding the famous Lewis and Clark expedition by twelve years. In his journals he details two separate voyages: one up what is now known as the Mackenzie River to the Arctic Ocean in 1789, and another to what is now Bella Coola on the Pacific Ocean in 1792 and 1793. Both journals provide a detailed description of the many difficulties in navigating and traveling in a country that had yet to be mapped. Having to rely on Native guides and rumors, and enduring hardships that almost beggar belief, Mackenzie and his

team were able to achieve their objective of finding an east to west land crossing through the Rocky Mountains and to the Pacific Ocean. Although his route didn't prove as practical as routes found by later explorers, Mackenzie has cemented himself as a key explorer of Western Canada. From the winner of the first Lannan Prize for Cultural Freedom, a biting funny, kaleidoscopic vision of the first world through the eyes of the third Eduardo Galeano, author of the incomparable Memory

of Fire Trilogy, combines a novelist's intensity, a poet's lyricism, a journalist's fearlessness, and the strong judgments of an engaged historian. Now his talents are richly displayed in Upside Down, an eloquent, passionate, sometimes hilarious exposé of our first-world privileges and assumptions. In a series of lesson plans and a "program of study" about our beleaguered planet, Galeano takes the reader on a wild trip through the global looking glass. From a master class in "The Impunity of Power" to a seminar on "The Sacred Car"--with tips along the way on "How to Resist Useless Vices" and a declaration of "The Right to Rave"--he surveys a world

unevenly divided between abundance and deprivation, carnival and torture, power and helplessness. We have accepted a reality we should reject, Galeano teaches us, one where machines are more precious than humans, people are hungry, poverty kills, and children toil from dark to dark. A work of fire and charm, *Upside Down* makes us see the world anew and even glimpse how it might be set right. "Galeano's outrage is tempered by intelligence, an ineradicable sense of humor, and hope." -Los Angeles Times, front page

The peaceful city of Ourense is shaken by a series of apparently unrelated murders. But the murderer's trademark leaves no room for doubt that these crimes are being committed by the same person; Emma, a highly intelligent young woman with an elaborate plan, and a motive that provides the driving force for her subsequent

actions. Eva, a police inspector, is the one in charge of solving the case. And so begins the race against the clock to prevent further deaths...

### **The Body Reader**

Simon and Schuster  
In these wildly imaginative, devilishly daring tales of the macabre, internationally bestselling author Mariana Enriquez brings contemporary Argentina to vibrant life as a place where shocking inequality, violence, and corruption are the law of the land, while military dictatorship and legions of desaparecidos loom large in the collective memory. In these stories, reminiscent of Shirley Jackson and Julio Cortázar, three young friends distract

themselves with drugs and pain in the midst a government-enforced blackout; a girl with nothing to lose steps into an abandoned house and never comes back out; to protest a viral form of domestic violence, a group of women set themselves on fire. But alongside the black magic and disturbing disappearances, these stories are fueled by compassion for the frightened and the lost, ultimately bringing these characters—mothers and daughters, husbands and wives—into a surprisingly familiar reality. Written in hypnotic prose that gives grace to the grotesque, *Things We Lost in the Fire* is a powerful exploration of what happens when

our darkest desires are left to roam unchecked, and signals the arrival of an astonishing and necessary voice in contemporary fiction.

This unique work presents one of the most significant organ failure condition - cardiocirculatory shock - and the prominent role of Methylene Blue (MB). Through their extensive experience, the authors' consider that the lifesaving feature of MB is still

underestimated. For this reason they outline key concepts of MB, mentioning essential experimental data, yet focusing mainly on its application in the care of critically ill patients.

In an easy-to-read format, the 18 chapters were organized in a didactically structured order, distributed in four parts. The first part introduces the general conceptual aspects and physiology of the endothelium.

The second part presents the particularities of endothelial dysfunction in different types of shock. Methylene blue is discussed in detail in the third part. In the fourth part, particular situations of endothelial dysfunction, such as heart surgery and

organ transplantation, are described. Additionally, the two complementary subjects of acid-base balance and the therapeutic use of inhaled nitric oxide are mentioned. Finally, looking for therapeutic alternatives for what we classify as "vasoplegic endothelial dysfunction", MB remains promising as an adjuvant to sympathomimetic amines. The combination of three recently proposed concepts may be useful in obtaining better results against the high mortality rates in critically ill patients. These three concepts are "wide-spectrum vasopressors", vasopressor economy strategies, and microcirculation protection against the

harmful effects of using high concentrations of amines. This book's translational approach will appeal to a variety of readers within the health specialties of medicine, biomedicine, physiotherapy, nursing, odontology, and basic science.

The definitive firsthand account of the groundbreaking research of Philip Zimbardo—the basis for the award-winning film *The Stanford Prison Experiment*. Renowned social psychologist and creator of the Stanford Prison Experiment, Philip Zimbardo explores the mechanisms that make good people do bad things, how moral people can be seduced into acting immorally, and what this says about the line separating good from evil. *The Lucifer Effect* explains how—and the myriad reasons why—we are all susceptible to the lure of “the dark side.” Drawing on examples from history as well as his own trailblazing research, Zimbardo

details how situational forces and group dynamics can work in concert to make monsters out of decent men and women. Here, for the first time and in detail, Zimbardo tells the full story of the Stanford Prison Experiment, the landmark study in which a group of college-student volunteers was randomly divided into “guards” and “inmates” and then placed in a mock prison environment. Within a week the study was abandoned, as ordinary college students were transformed into either brutal, sadistic guards or emotionally broken prisoners. By illuminating the psychological causes behind such disturbing metamorphoses,

Zimbardo enables us to better understand a variety of harrowing phenomena, from corporate malfeasance to organized genocide to how once upstanding American soldiers came to abuse and torture Iraqi detainees in Abu Ghraib. He replaces the long-held notion of the “bad apple” with that of the “bad barrel”—the idea that the social setting and the system contaminate the individual, rather than the other way around. This is a book that dares to hold a mirror up to mankind, showing us that we might not be who we think we are. While forcing us to reexamine what we are capable of doing when caught up in the crucible of behavioral

dynamics, though, Zimbardo also offers hope. We are capable of resisting evil, he argues, and can even teach ourselves to act heroically. Like Hannah Arendt's Eichmann in Jerusalem and Steven Pinker's *The Blank Slate*, *The Lucifer Effect* is a shocking, engrossing study that will change the way we view human behavior. Praise for *The Lucifer Effect* "The *Lucifer Effect* will change forever the way you think about why we behave the way we do—and, in particular, about the human potential for evil. This is a disturbing book, but one that has never been more necessary."—Malcolm Gladwell "An important book . . . All politicians and social commentators . . .

should read this."—The Times (London) "Powerful . . . an extraordinarily valuable addition to the literature of the psychology of violence or 'evil.'"—The American Prospect "Penetrating . . . Combining a dense but readable and often engrossing exposition of social psychology research with an impassioned moral seriousness, Zimbardo challenges readers to look beyond glib denunciations of evil-doers and ponder our collective responsibility for the world's ills."—Publishers Weekly "A sprawling discussion . . . Zimbardo couples a thorough narrative of the Stanford Prison Experiment with an analysis of the social dynamics of the Abu

Ghraib prison in Iraq.”—Booklist  
 “Zimbardo bottled evil in a laboratory. The lessons he learned show us our dark nature but also fill us with hope if we heed their counsel. The Lucifer Effect reads like a novel.”—Anthony Pratkanis, Ph.D., professor emeritus of psychology, University of California

 "CARTAS DESDE EL MALTRATO" es el título de este libro en el que se recogen las 246 cartas que componen el diario original y sin censuras escrito por mi pareja durante el maltrato físico y psicológico al que fue sometida entre los años 2006 al 2008 por quien ya en aquella época se había convertido en su ex-marido. Presentado

desde un punto de vista crítico, a través de la introducción, las propias cartas y el epílogo final se narra no sólo cómo surge y va creciendo la violencia del maltratador sino también sus efectos y el ambiguo papel que adopta en todo momento el entorno social y familiar tanto del maltratador como de la propia víctima.

 The product of five years' investigative reporting, the subject of intense national controversy, and the source of death threats that forced the National Human Rights Commission to assign two full-time bodyguards to its author, Anabel Hernández, *Narcoland* has been a publishing and political sensation

in Mexico. The definitive history of the drug cartels, *Narcoland* takes readers to the front lines of the “war on drugs,” which has so far cost more than 60,000 lives in just six years. Hernández explains in riveting detail how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names names – not just the narcos, but also the politicians, functionaries, judges and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth of corruption in Mexico’s government and business elite. Hernández became a journalist after her father was kidnapped

and killed and the police refused to investigate without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. In awarding Hernández the 2012 Golden Pen of Freedom, the World Association of Newspapers and News Publishers noted, “Mexico has become one of the most dangerous countries in the world for journalists, with violence and impunity remaining major challenges in terms of press freedom. In making this award, we

recognize the strong stance Ms. Hernández has taken, at great personal risk, against drug cartels."

Civilization, sketching the genealogy of psychiatry and of its characteristic form of power/knowledge. Madness and Civilization undertook the archeology of the division according to which, in Western Society, the madman found himself separated from the sane. That book ends with the medicalization of madness at the beginning of the nineteenth century. **Psychiatric Power** continues this discourse up to the end of the nineteenth century, and the double "depsychiatrization" of madness, now dispersed between the neurologist and the psychoanalyst.
