In 1994, 16-year-old Emmanuel Taban walked out of war-torn Sudan with nothing and nowhere to go after he had been tortured at the hands of government forces, who falsely accused him of spying for the rebels. When he finally managed to escape, he literally

took a wrong turn and, instead of being reunited with his family, ended up in neighbouring Eritrea as a refugee. Over the months that followed, young Emmanuel went on a harrowing journey, often spending weeks on the streets and facing many dangers. Relying on the generosity of strangers, he made the long journey south to South Africa, via Ethiopia, Kenya, Tanzania, Mozambique and Zimbabwe, travelling mostly by bus and on foot. When he reached Johannesburg, 18 months after fleeing

Sudan, he was determined to resume his education. He managed to complete his schooling with the help of Catholic missionaries and entered medical school, qualifying as a doctor, and eventually specialising in pulmonology. Emmanuel's skills and dedication as a physician, and his stubborn refusal to be discouraged by setbacks, led to an important discovery in the treatment of hypoxaemic COVID-19 patients. By never giving up, this son of South Sudan has risen above extreme poverty, racism and xenophobia to become a South African and African legend. This is his story.

South Africa, a Country Study Prentice Hall

This is the story of Deirdre Barnard - champion water-skier, daughter of

pioneering heart surgeon Chris Barnard, woman in her own right. In this wise and funny book, Deirdre Barnard stands up and tells it like it is - about life in the Barnard family as they coped with the successes and losses that befell them, about the heartless intrusions into privacy that were the flip side of fame, about bereavement and true friendship and the sustaining power of family. Deirdre Barnard is an entertaining and courageously forthright storyteller with a wicked wit. This is a moving account of her sometimes painful but ultimately uplifting personal journey; its compassion and humour will touch us all.

**Fat, Fame, and Life with Father**

Bernan Press(PA)

The book is intended to be an introductory guide for healthcare

practitioners, legal practitioners, healthcare students and law students who are concerned with the delivery of healthcare services in South Africa. The book emphasises the ethical and legal aspects of healthcare in the country while making references to international human rights and ethical standards applicable to healthcare services. As the book is a guide, it does not deal exhaustively with the topics discussed. Instead it aims to give healthcare and legal practitioners some general guidelines. New edition update: - an updated ethics chapter that includes a robust section on African indigenous values in the context of health care. - a chapter on universal health care coverage and the NHI. - the legislation need to be reviewed and updated. - a

section on alternate dispute resolution. - the section on research also requires updating. - the case studies also need to be made more recent to include current contextually relevant issues like the Life Esidimeni Tragedy. Table of contents: Part 1: Introduction to Bioethics, Human Rights and Health Law: Principles and Practice - Background Chapter 1 Ethical concepts, theories and principles and their application to healthcare Chapter 2. Codes of healthcare ethics Chapter 3. Health and human rights Chapter 4. Health law - the basics Part 2: Specific Topics Chapter 5. Professionalism and the healthcare practitioner-patient relationship Chapter 6. Consent Chapter 7. Confidentiality Chapter 8. Medical malpractice and professional negligence Chapter 9. Reproductive health Chapter

10. Issues in genetics Chapter 11. Use of human tissue Chapter 12. End of life issues Chapter 13. HIV and AIDS Chapter 14. Resource allocation Chapter 15. Business ethics - the healthcare context Chapter 16. Human health and the environment Chapter 17. The ethics of research

Are you suffering from sleep deprivation because your baby will just not sleep through the night? Have you tried

everything and reached the end of your tether? Then this is the book you have been waiting for. It offers the same simple, sensible solutions to ensure you and your baby will get a good night's sleep by establishing healthy sleeping habits. Learn to set the stage for sleep with: realistic expectations; appropriate sensory experiences during the day; the right sleep zone; the elimination of hunger or medical reasons for night wakings; healthy and sufficient day sleeps; good sleep associations to prime your baby for independent night soothing and teach him to re-settle by himself; solutions for separation issues. In addition the book offers an age-related trouble shooting section where desperate parents will find quick fixes. The Sleep sense approach to sleep

coaching is gentle and based on the natural and age-appropriate capacity your baby has for self-calming or soothing, and for separation from you.

Medical doctors and allied health professionals deal with a range of complex legal issues on a daily basis, making decisions that have far reaching medical-legal consequences. They must stay informed and up-to-date with their rights and obligations under legislation in order to protect both themselves and the patients in their care. This is an essential quick-reference book for medical professionals. Written by an internationally renowned team of medical-legal academics, this book should be on the bookshelf of every health care practitioner.

*The Year of Fire* Pan MacMillan

The focus of this two-volume work is osseo integration. It discusses the use of glue to attach bony tissue as well as the

use of the absence of biochemical interactions between some oxide ceramics (particularly pure Al<sub>2</sub>O<sub>3</sub> ceramic) and the adjacent tissue. This book also demonstrates the possibility of controlling the interface remodelling by the stresses and strains created by the insertion of the implant. Written in a concise, easy-to-read format, this text covers the use of implants in orthopedics, maxillo-facial surgery, and dentistry. All those involved with bioengineering, orthopedics, maxillo-facial surgery, dentistry, and biomechanics will find this reference to be of particular interest.

From the political ashes of the late 1960s, new and radical initiatives grew with surprising speed in the first half of the 1970s. *The New Radicals: A Generational Memoir of the 1970s* tells the story of a generation of South African activists who embraced and developed forms of opposition politics that had profound consequences. Within six short years, the politics of opposition and resistance had developed from an historical low point to the beginnings of a radicalism which would lead to the first democratic election in 1994. The book explores the influence of Black Consciousness, the new trade unionism, radicalisation of students on both black and white campuses, the Durban strikes, and Soweto 1976, and concludes that

these developments were largely the result of home-grown initiatives, with little influence exercised by the banned and exiled movements for national liberation.

**Wotton** Amer Heart Assn Incorporated  
The indomitable Dr Tlaleng Mofokeng - affectionately known as Dr T - is passionate about making sexual health and well-being services available to all, regardless of their sexual and gender identities and their economic status. This updated edition of her bestselling book is filled with the specifics of sexual anatomy and health as well as advice and facts about pleasure and sexual rights, and includes additional resources along with new sections on coercive control as well as sex and pleasure

during the time of COVID. Dr T, with her typically honest and warm approach, makes the reader feel comfortable reading about topics that are not always discussed freely, providing ALL the information that demystifies sex and sexuality in a way that is entertaining and enlightening.

### **Anxiety and Depression in People with Intellectual Disabilities** Juta and Company Ltd

An explosive, hard hitting expose which delves into the mass systemic corruption in South African sport which is shattering the dreams of the country's athletes who are silenced by draconian codes of conduct. The author is former CNN International Sports anchor turned investigative sports journalist, Graeme Joffe who had to flee his native South

Africa, fearing for his safety. He returned to the USA where he applied for political asylum. Joffe was a lone crusader for seven years with a big target on his back as he reported without fear or favor. Top ranking government officials, administrators, coaches, companies, media and friends are named and shamed. It was a dark and lonely crusade in a country which has little to no culture of investigative sports journalism. More than 20 years into the country's democracy, the corrupt have destroyed Nelson Mandela's incredible legacy and his immortal words: "Sport has the power to change the world." The book details: How the author got into investigative sports journalism and the dangers of being a whistle-blower. The corruption in numerous sporting codes

led by the South African Olympic Committee (SASCOC). SASCOC sued the author in his personal capacity for defamation for R21.1 million (about \$1.5 million) to try to bully, silence and cripple him financially. It was a malicious prosecution! The SA Rugby president opened a criminal defamation case against Joffe, wanting him to be arrested as soon as he sets foot back in South Africa. There were numerous legal threats from those who had something to hide and didn't like to be exposed. How the International sporting federations, "big boys clubs" eg. IOC, FIFA have led by such a poor example and turn a blind eye in the buddy buddy system. World renowned auditors, marketing, media and other companies have played a key role in the capture of

South African sport. Why South Africa is a perennial under achiever on the Olympic stage. A very different background and view on Oscar Pistorius (the blade-runner) and the murder of his girlfriend, Reeva Steenkamp. It was a "political decision" to send Oscar to the Olympic Games in London! Drug testing? The author being spied on, followed, illegally phone tapped and his emails were hacked. An anonymous fake website was created to defame and discredit the whistle-blower. The 2022 Commonwealth Games embarrassment - Durban won the bid but was then stripped of the rights to host. Joffe warned the Commonwealth Games Federation but it fell on deaf ears. How SA bribed its way to host the 2010 FIFA World Cup - all the dirty players. A

chance meeting with the FBI in Cincinnati. The abuse and grand theft of National Lottery funding whilst athletes have to pay their own way and charities are suffering. Sexual harassment and alleged rape cover ups by sports people with power. Television and mobile rights - dirty tenders? Blacklisted from sporting events. The detrimental mix of sport and politics. Racism, quotas and the lack of transformation. Defamation insurance - good or bad? The addiction of investigative journalism and how it changes ones life. Fighting for what's right and standing up for the truth. Has sports betting aided the scourge of corruption? Trying to make a difference with a social responsibility project, Township TV which changed the lives of so many with free entertainment 365

days of the year. Fleeing South Africa, going underground, the get-away and not knowing who to trust, if anyone. The police file goes missing and the roller-coaster waiting for arrests which never happened. Application process for political asylum, making a new life and starting again in the USA. Living a boys dream of teaching tennis and caddying on an island. Poking the bear on social media from a distance and not giving up the fight. Having no regrets, vindication and hoping for a better future for SA's sportsmen and women who deserve so much better. And on the lighter side, the author was the "Bachelor" - well kind of!

*Decisions of the Appeal Board* McGraw-Hill/Appleton & Lange

Demonstrates first aid procedures for common childhood emergencies.

### **Dr T CRC Press**

This contemporary text presents a treatment of childbearing content and an elaboration of the care delivery system, including cultural aspects, current research abstracts, and delivery of maternity care in the community. Organised according to phases of the childbearing cycle, the second edition emphasises critical thinking and three kinds of decision making: ethical, diagnostic, and therapeutic; as well as the psychological, social, cultural and economic aspects of the childbearing family. It retains the Case Study/Care Plan format and includes an increased number of tables, boxed highlighted information, and illustrations.

### **A-Z of Medical Law**

Recent political, religious, ethnic, and

racial conflicts, as well as mass disasters, have significantly helped to bring to light the almost unknown discipline of forensic anthropology. This science has become particularly useful to forensic pathologists because it aids in solving various puzzles, such as identifying victims and documenting crimes. On topics such as mass disasters and crimes against humanity, teamwork between forensic pathologists and forensic anthropologists has significantly increased over the few last years. This relationship has also improved the study of routine cases in local medicolegal institutes. When human remains are badly decomposed, partially skeletonized, and/or burned, it is particularly useful for the forensic pathologist to be assisted by a forensic anthropologist. It is not a one-

way situation: when the forensic anthropologist deals with skeletonized bodies that have some kind of soft tissue, the advice of a forensic pathologist would be welcome. Forensic anthropology is a subspecialty/field of physical anthropology. Most of the background on skeletal biology was gathered on the basis of skeletal remains from past populations. Physical anthropologists then developed an indisputable “know-how”; nevertheless, one must keep in mind that looking for a missing person or checking an assumed identity is quite a different matter. Pieces of information needed by forensic anthropologists require a higher level of reliability and accuracy than those granted in a general archaeological context. To achieve a positive identification,

findings have to match with evidence, particularly when genetic identification is not possible.

### Obstetric Interventions

The first comprehensive overview of an emerging field, Metabolic Medicine and Surgery introduces a new paradigm in patient management that crosses existing subspecialty boundaries. This approach is necessitated by the challenges of treating patients with obesity, metabolic syndrome, cardiovascular disease and prediabetes, as well as those with maldigestion, malabsorption, malnutrition and nutritional deficiencies. This book teaches physicians and surgeons what they need to know about clinical nutrition, metabolism and the metabolic effects of bariatric surgery. It is also

applicable to those in primary care, including physicians, residents, medical students, nurses and nurse practitioners, physician assistants and dietitians who are on the front lines of treating patients with obesity, diabetes and cardiovascular disease. The book is presented in four sections: 1. An Overview of Metabolic Medicine and Surgery; 2. Metabolic Syndrome, Insulin Resistance and Obesity; 3. Diseases of Undernutrition and Absorption; 4. A Nutritional Relationship to Neurological Diseases. It contains chapters from world-renowned experts who are widely published in major medical journals. The book also benefits from the contributions of clinicians with extensive experience and perspective in the field, including many who have been witness to its

major developments. This book's strength lies in the cross-specialty consensus created by the collaboration of the editors and further developed by their renowned contributors. It demonstrates how medicine, surgery, therapeutics, and nutrition can be combined synergistically to impact patient outcomes. It crystallizes the efforts of a multitude of physicians and scientists trying to control the linked pandemics of obesity, type-2 diabetes and cardiovascular disease. This book helps you develop comprehensive solutions to diseases afflicting vast numbers of patients worldwide.

### **Commercial Directory**

Emphasizing core nursing skills and the importance of a strong foundation in professional practices, this work details

the many ethical and legal components to the nurse-patient relationship. A New Approach to Professional Practice provides sound advice on all relevant issues for nurses, including explaining the importance of the scope of practice so that nurses fully understand the framework of their position; discussing all relevant legal aspects to explain such implications on day-to-day work; detailing the rights and responsibilities of the patient so as to provide total clarity on the nurse-patient relationship; and providing information on communication and its relevance to privacy, listening skills, record keeping, and electronic information. The new approach outlined in this resource makes extensive use of case studies drawn from real-life situations,

illustrating and explaining theoretical concepts in full to readers.

### **The Boy Who Never Gave Up**

This handbook focuses on intervention strategies for anxiety and depression in people with learning disabilities and explores the full range of anxiety and depressive illnesses, capturing its manifestation, assessment and bio-psycho-social intervention models. Among other things, the book aims to: describe the aetiology and demography of intellectual disabilities and mental health disorder with special reference to anxiety and depression critically

evaluate the contribution of health and social care professionals to the care and support of people with anxiety and depression discuss the full range of interventions for people with learning disabilities and anxiety and depression critically examine current philosophy and practice in the support of people with intellectual disabilities and describe the tensions and dilemmas of supporting people with anxiety and depression.
