LAWRENCE HIGGINS

Changing Our Minds Holt McDougal

Named one of the best music books of 2017 by The Wall Street Journal An elegy to the age of the Rock Star, featuring Chuck Berry, Elvis, Madonna, Bowie, Prince, and more, uncommon people whose lives were transformed by rock and who, in turn, shaped our culture Recklessness, thy name is rock. The age of the rock star, like the age of the cowboy, has passed. Like the cowboy, the idea of the rock star lives on in our imaginations. What did we see in them? Swagger. Recklessness. Sexual charisma. Damn-the-torpedoes self-belief. A certain way of carrying themselves. Good hair. Interesting shoes. Talent we wished we had. What did we want of them? To be larger than life but also like us. To live out their songs. To stay young forever. No wonder many didn't stay the course. In *Uncommon People*, David Hepworth zeroes in on defining moments and turning points in the lives of forty rock stars from 1955 to 1995, taking us on a journey to burst a hundred myths and create a hundred more. As this tribe of uniquely motivated nobodies went about turning themselves into the ultimate somebodies, they also shaped us, our real lives and our fantasies. *Uncommon People* isn't just their story. It's ours as well.

Overthrow Little, Brown

SNA techniques are derived from sociological and social-psychological theories and take into account the whole network (or, in case of very large networks such as Twitter -- a large segment of the network).

The Dueling Machine Robinson

In 1812, the skeleton of a monster was discovered beneath the cliffs of Dorset, setting in motion a collision between science and religion, and among scientists eager to claim supremacy in a brand-new field. For Reverend William Buckland, an eccentric naturalist at Oxford University, the fossil remains of a creature that existed before Noah's flood inspired an attempt to prove the accuracy of the biblical record. Novelist Gideon Mantell also became obsessed with the ancient past, and eminent anatomist Richard Owen soon entered the fray, claiming credit for the discovery of the dinosaurs. In a fast-paced narrative, *Terrible Lizard* re-creates the bitter feud between Mantell and Owen. Revealing a strange, awesome prehistoric era, their struggle set the stage for Darwin's shattering theories -- and for controversies that still rage today.

Night Star "O'Reilly Media, Inc."

Information and instructions for teacher led demonstrations to assist in introducing and explaining science concepts.

Star Stuff Holt Paperbacks

The dueling machine helps keep peace throughout the universe until a terrestrial power devises a telepathic means of controlling the machine thus jeopardizing the security of all solar systems.

Earth Science St. Martin's Press

Hollywood often depicts wars being won by brawn, fire, and steel. But as this meticulous and riveting study of strategic deception in World War II reveals, wars can be determined by guile and clever disinformation. The Allied powers used and broke codes, had agents in sensitive enemy posts, and planned and executed ingenious ploys to one-up the Axis powers. Great generals were duped. Entire armies were misled. And because of it, the bloodiest war in human history was ended. Through declassified documents and interviews with war survivors, Thaddeus Holt presents-in astonishing detail-the secrets that helped the Allies win the Second World War. Book jacket.

Uncommon People Holt McDougal

"A Star is Bored is an absolute knockout. Riotously funny and wickedly tender." — Taylor Jenkins Reid, New York Times bestselling author of *Daisy Jones and the Six* "Wildly funny and irreverent...

Lane's writing lifts the novel far above its gossamer Hollywood setting, suffusing [the novel] with a complex sensitivity." - The New York Times Book Review A hilariously heartfelt novel influenced in part by the author's time assisting Carrie Fisher. People Magazine Best Book of Summer 2020 - Named a Must-Read Summer book by Town & Country - Named One of the 14 Best Books of Summer 2020 by Harper's Bazaar - One of Library Journal's 2020 "Titles to Watch" - One of the 30 Best Beach Reads According to Parade Magazine She needs an assistant. He needs a hero. Charlie Besson is tense and sweating as he prepares for a wild job interview. His car is idling, like his life, outside the Hollywood mansion of Kathi Kannon, star of stage and screen and People magazine's Worst Dressed list. She's an actress in need of assistance, and he's adrift and in need of a lifeline. Kathi is an icon, bestselling author, and award-winning movie star, most known for her role as Priestess Talara in a blockbuster sci-fi film. She's also known in another role: Outrageous Hollywood royalty. Admittedly so. Famously so. Chaotically so, as Charlie quickly discovers. Charlie gets the job, and his three-year odyssey is filled with late-night shopping sprees, last-minute trips to see the aurora borealis, and an initiation to that most sacred of Hollywood tribes: the personal assistant. But Kathi becomes much more than a boss, and as their friendship grows Charlie must make a choice. Will he always be on the sidelines of life, assisting the great forces that be, or can he step into his own life's leading role? Laugh-out-loud funny, and searingly poignant, Byron Lane's *A Star is Bored* is a novel that, like the star at its center, is enchanting and joyous, heartbreaking and hopeful.

Catalog of Copyright Entries. Third Series Henry Holt and Company

Offers a narrative history of the role of the U.S. in a series of coups, revolutions, and invasions that toppled fourteen foreign governments, from the overthrow of the Hawaiian monarchy in 1893 to the 2003 war in Iraq, and examines the sometimes disastrous long-term repercussions of such operations. Reprint.

Vintage Science Fiction Films, 1896-1949 Macmillan

"A biography of Carl Sagan focusing on his childhood and culminating in the Voyager mission and the Golden Record"--Provided by publisher.

A Star Is Bored Henry Holt and Company

New York Times Bestseller "Julie Lythcott-Haims is a national treasure. . . . A must-read for every parent who senses that there is a healthier and saner way to raise our children." -Madeline Levine, author of the New York Times bestsellers *The Price of Privilege* and *Teach Your Children Well* "For parents who want to foster hearty self-reliance instead of hollow self-esteem, *How to Raise an Adult* is the right book at the right time." -Daniel H. Pink, author of the New York Times bestsellers *Drive* and *A Whole New Mind* A provocative manifesto that exposes the harms of helicopter parenting and sets forth an alternate philosophy for raising preteens and teens to self-sufficient young adulthood In *How to Raise an Adult*, Julie Lythcott-Haims draws on research, on conversations with admissions officers, educators, and employers, and on her own insights as a mother and as a student dean to highlight the ways in which overparenting harms children, their stressed-out parents, and society at large. While empathizing with the parental hopes and, especially, fears that lead to overhelping, Lythcott-Haims offers practical alternative strategies that underline the importance of allowing children to make their own mistakes and develop the resilience, resourcefulness, and inner determination necessary for success. Relevant to parents of toddlers as well as of twentysomethings-and of special value to parents of teens-this book is a rallying cry for those who wish to ensure that the next generation can take charge of their own lives with competence and confidence.

The Terrible Lizard Holt McDougal

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion,

the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Archaeology from Space Metropolitan Books

A study of the origins of love probes the human brain for insights into the origins of the sex drive, romance, and attraction, while offering advice on how to channel these desires into healthy pursuits.

Science, Fables and Chimeras Macmillan

A Mighty Girl Best Book of 2020! From debut author Sarah Allen comes a pitch-perfect, heartwarming middle grade novel about growing up, finding yourself, and loving people with everything you're made of. Twelve-year-old Libby Monroe is great at science, being optimistic, and talking to her famous, accomplished friends (okay, maybe that last one is only in her head). She's not great at playing piano, sitting still, or figuring out how to say the right thing at the right time in real life. Libby was born with Turner Syndrome, and that makes some things hard. But she has lots of people who love her, and that makes her pretty lucky. When her big sister Nonny tells her she's pregnant, Libby is thrilled—but worried. Nonny and her husband are in a financial black hole, and Libby knows that babies aren't always born healthy. So she strikes a deal with the universe: She'll enter a contest with a project about Cecilia Payne, the first person to discover what stars are made of. If she wins the grand prize and gives all that money to Nonny's family, then the baby will be perfect. Does she have what it takes to care for the sister that has always cared for her? And what will it take for the universe to notice?

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Queens of Animation Henry Holt and Company

A brilliant and courageous doctor reveals, in gripping accounts of true cases, the power and limits of modern medicine. Sometimes in medicine the only way to know what is truly going on in a patient is to operate, to look inside with one's own eyes. This book is exploratory surgery on medicine itself, laying bare a science not in its idealized form but as it actually is -- complicated, perplexing, and profoundly human. Atul Gawande offers an unflinching view from the scalpel's edge, where science is ambiguous, information is limited, the stakes are high, yet decisions must be made. In dramatic and revealing stories of patients and doctors, he explores how deadly mistakes occur and why good surgeons go bad. He also shows us what happens when medicine comes up against the inexplicable: an architect with incapacitating back pain for which there is no physical cause; a young woman with nausea that won't go away; a television newscaster whose blushing is so severe that she cannot do her job. Gawande offers a richly detailed portrait of the people and the science, even as he tackles the paradoxes and imperfections inherent in caring for human lives. At once tough-minded and humane, *Complications* is a new kind of medical writing, nuanced and lucid, unafraid to confront the conflicts and uncertainties that lie at the heart of modern medicine, yet always alive to the

possibilities of wisdom in this extraordinary endeavor. *Complications* is a 2002 National Book Award Finalist for Nonfiction.

Holt Science and Technology Henry Holt and Company

The history of science provides numerous examples of the way in which imagination, religion and mythology have sometimes helped and sometimes hindered scientific progress. While established ideas and beliefs clearly held back the discoveries of Copernicus, Galileo and Darwin, the intuitive knowledge found in mythology, art and religion has often proved useful in indicating new ways in which to explore or represent new knowledge of the world. Stories, fables and images have contributed to drawing a fuller picture of the past, understanding the present and imagining the future. The essays in this book, written by academics, writers and artists from various fields ranging from La Fontaine's fables to nanotechnology and modern art, all point out the ways in which imagination works its way into all the fields of knowledge. At both ends of the spectrum, the hybrid nature of the chimera emerges as a pivotal symbol of both man's predation instinct and a powerful symbol of his fear of extinction. This interdisciplinary book, weaving together visual representation, literature, mysticism, and science, will appeal to historians of science, philosophy, art and religion. It will also be of interest to scholars in cultural studies and anthropology. Drawing on recent scientific research and artistic production, the volume will additionally interest a wider audience wishing to learn more about man's obsession and fascination with the potent symbolism of dinosaurs and dragons and all hybrid forms generated by the human imagination and recent technology.

[Holt Science and Technology](#) Farrar, Straus and Giroux (BYR)

From the bestselling author of *Rise of the Rocket Girls*, the untold, "richly detailed" story of the women of Walt Disney Studios, who shaped the iconic films that have enthralled generations (Margot Lee Shetterly, New York Times bestselling author of *Hidden Figures*). From *Snow White* to *Moana*, from *Pinocchio* to *Frozen*, the animated films of Walt Disney Studios have moved and entertained millions. But few fans know that behind these groundbreaking features was an incredibly influential group of women who fought for respect in an often ruthless male-dominated industry and who have slipped under the radar for decades. In *The Queens of Animation*, bestselling author Nathalia Holt tells their dramatic stories for the first time, showing how these women infiltrated the boys' club of Disney's story and animation departments and used early technologies to create the rich artwork and unforgettable narratives that have become part of the American canon. As the influence of Walt Disney Studios grew -- and while battling sexism, domestic abuse, and workplace intimidation -- these women also fought to transform the way female characters are depicted to young audiences. With gripping storytelling, and based on extensive interviews and exclusive access to archival and personal documents, *The Queens of Animation* reveals the vital contributions these women made to Disney's Golden Age and their continued impact on animated filmmaking, culminating in the record-shattering *Frozen*, Disney's first female-directed full-length feature film. A Best Book of 2019: Library Journal, Christian Science Monitor, and Financial Times

Holt Science & Technology: Physical Science Thomas Nelson Inc

When a planet, moving faster than Earth, entered the Solar System out beyond Pluto, the reporters, for want of a better name, termed it "Planet X." "Planet X, that astronomical curiosity," became, in a few short weeks, an object of stark terror to the billions of people scattered on the planets around our Sun, from blazing Mercury to frigid Pluto. To Bob Griffith's father, Commander of the Ninth Wing of the Solar Federation's Space Navy, fell the task of investigating the strange visitor whose black ships moved through space without rocket exhaust, and whose weapons literally melted spaceships out of the heavens. As his father's aid, aboard the gleaming LANCE OF DEIMOS that led the reconnaissance fleet, Bob watched in horror the first incident that would start a war which the Solar Federation "could not win." This gripping tale that rockets from Neptune's tiny moon of Outpost, base of the Federation's Navy, to the orbit of an Earth threatened with destruction, features a young space cadet and his father, who, while preparing for war, desperately search for peace. How Bob Griffith finds himself a captive on the mysterious planet, Thule; details of life on a world that has learned how to overcome the forces of gravity and momentum; the discussions that rage over the acceptance of a "wandering planet" into the Solar alliance come alive in a book that vividly creates a troubled era in a fascinating universe of the future! Lester del Rey (1915 - 1993) was an American science fiction author and editor. He was the author of many books in the juvenile Winston Science Fiction series, and the editor at Del Rey Books, the fantasy and science fiction imprint of Ballantine Books, along with his fourth wife Judy-Lynn del Rey.
