Intersectionality can be used to analyse whether migration leads to changes in gender relations. This book finds out how migrants from a peri-urban neighbourhood on the outskirts of Cochabamba, Bolivia, make sense of the migration journeys they have undertaken. Migration is intrinsically related to social transformation. Through life stories and community surveys, the author explores how gender, class, and ethnicity intersect in people's attempts to make the most of the opportunities presented to them in distant labour markets. While aiming to improve their economic and material conditions, migrants have created a new transnational community that has undergone significant changes in the ways in which gender relations are organised. Women went from being mainly housewives to taking on the role of the family's breadwinner in a matter of just one decade. This book asks and addresses important questions such as: what does this mean for gender equality and women's empowerment? Can we talk of migration being emancipatory? Does intersectionality shed light in the analysis of everyday social transformations in contexts of transnational migrations? This book will be useful to researchers and students of human geography, development studies and Latin America area studies.

With a distinctive focus both on methodologies and theoretical frameworks, the Handbook includes 40 state-of-the-art chapters from international authorities. Each chapter provides a concise and critical discussion of a methodological approach, an empirical study to model the approach, a discussion of real-world

applications, and further reading. Each section also contains a chapter by leading scholars in that area, positioning, through their own work and chapters in their part, current state-of-the-art and future directions. This volume is key reading for all engaged in the study and research of language, gender, and sexuality within English language, sociolinguistics, discourse studies, applied linguistics, and gender studies.

This highly engaging and innovative book about the Cameroonian youth language Camfranglais explores gender-based differences in exposure to, and usage of, the variety through a comparative study. It thus adopts a rare gender-based approach to the highly complex linguistic phenomenon Camfranglais, a mix of French, Verlan, English, Pidgin and Cameroonian languages. While youth language studies flourish in sociolinguistic research, this book's explicit focus on female speakers, their linguistic attitudes and experiences of exclusion, is unique. It investigates which factors influence language choice among young, urban speakers and especially what contributes to the overall male dominance in the usage of Camfranglais. To achieve this goal, the attitudes of both adolescents and adults as well as the channels of reproduction and distribution of the variety are examined. A special focus is laid on the processes of conscious transformation and exclusion by which male speakers try to restrict the access for female speakers. The book will appeal to academic scholars from a wide variety of fields, such as (African) linguistics, anthropology, sociology, and gender-studies, as well as the general reader who wants to learn about an exciting language contact scenario and its outcome.

This is the second of a three-volume comprehensive reference work on "Gender across Languages", which provides systematic descriptions of various categories of gender (grammatical, lexical, referential, social) in 30 languages of diverse genetic, typological and socio-cultural backgrounds. Among the issues discussed for each language are the following: What are the structural properties of the language that have an impact on the relations between language and gender? What are the consequences for areas such as agreement, pronominalisation and word-formation? How is specification of and abstraction from (referential) gender achieved in a language? Is empirical evidence available for the assumption that masculine/male expressions are interpreted as generics? Can tendencies of variation and change be observed, and have alternatives been proposed for a more equal linguistic treatment of women and men? This volume (and the previous two volumes) will provide the much-needed basis for explicitly comparative analyses of gender across languages. All chapters are original contributions and follow a common general outline developed by the editors. The book contains rich bibliographical and indexical material. Languages of Volume 2: Chinese, Dutch, Finnish, Hindi, Icelandic, Italian, Norwegian, Spanish, Vietnamese, Welsh.

Combining fresh, critical insights from a feminist and anti-racist perspective, this is an excellent synthesis of some of the most important issues on the French public policy agenda. It provides detailed analysis and broad contextualization of debates on employment, parity, domestic violence, abortion, prostitution, and Islamic headscarves.

Landscapes, Gender, and Ritual Space John Benjamins Publishing

The division of land and consolidation of territory that created the Greek polis also divided sacred from productive space, sharpened distinctions between purity and pollution, and created a ritual system premised on gender difference. Regional sanctuaries ameliorated competition between city-states, publicized the results of competitive rituals for males, and encouraged judicial alternatives to violence. Female ritual efforts, focused on reproduction and the health of the family, are less visible, but, as

this provocative study shows, no less significant. Taking a fresh look at the epigraphical evidence for Greek ritual practice in the context of recent studies of landscape and political organization, Susan Guettel Cole illuminates the profoundly gendered nature of Greek cult practice and explains the connections between female rituals and the integrity of the community. In a rich integration of ancient sources and current theory, Cole brings together the complex evidence for Greek ritual practice. She discusses relevant medical and philosophical theories about the female body; considers Greek ideas about purity, pollution, and ritual purification; and examines the cult of Artemis in detail. Her nuanced study demonstrates the social contribution of women's rituals to the sustenance of the polis and the identity of its people.

As the first major encyclopedia of its kind, The Oxford Encyclopedia of the Bible and Gender Studies (OEBGS) is the go-to source for scholars and students undertaking original research in the field. Extending the work of nineteenth and twentieth century feminist scholarship and more recent queer studies, the Encyclopedia seeks to advance the scholarly conversation by systematically exploring the ways in which gender is constructed in the diverse texts, cultures, and readers that constitute the world of the Bible. With contributions from leading scholars in gender and biblical studies as well as contemporary gender theorists, classicists, archaeologists, and ancient historians, this comprehensive reference work reflects the diverse and interdisciplinary nature of the field and traces both historical and modern conceptions of gender and sexuality in the Bible. The two-volume Encyclopedia contains more than 160 entries ranging in length from 1,000 to 10,000 words. Each entry includes bibliographic references and suggestions for further reading, as well as a topical outline and index to aid in research. The OEBGS builds upon the pioneering work of biblically focused gender theorists to help guide and encourage further gendered discussions of the Bible.

As Enlightenment notions of predictability, progress and the sense that humans could control and shape their environments informed European thought, catastrophes shook many towns to the core, challenging the new world view with dramatic impact. This book concentrates on a period marked by passage from a society of scarcity to one of expenditure and accumulation, from ranks and orders to greater social mobility, from traditional village life to new bourgeois and even individualistic urbanism. The volume employs a broad definition of catastrophe, as it examines how urban communities conceived, adapted to, and were transformed by catastrophes, both natural and human-made. Competing views of gender figure in the telling and retelling of these analyses: women as scapegoats, as vulnerable, as victims, even as cannibals or conversely as defenders, organizers of assistance, inspirers of men; and men in varied guises as protectors, governors and police, heroes, leaders, negotiators and honorable men. Gender is also deployed linguistically to feminize activities or even countries. Inevitably, however, these tragedies are mediated by myth and memory. They are not neutral events whose retelling is a simple narrative. Through a varied array of urban catastrophes, this book is a nuanced account that

physically and metaphorically maps men and women into the urban landscape and the worlds of catastrophe.

Macmillan's Progressive French Course II. Cengage Learning

This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin. Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard; he draws on data from the Middle Ages to the present from all the Romance languages and dialects, discussing examples from Romanian to Portuguese and crucially also focusing on less widely-studied varieties such as Sursilvan, Neapolitan, and Asturian. The investigation first reveals that several varieties display more complex systems than the binary masculine/feminine contrast familiar from modern French or Italian. Moreover, it emerges that traditional accounts, whereby neuter gender was lost in the spoken Latin of the late Empire, cannot be correct: instead, the neuter gender underwent a range of different transformations from Late Latin onwards, which are responsible for the different systems that can be observed today across the Romance languages. The volume provides a detailed description of many of these systems, which in turns reveals a wealth of fascinating data, such as varieties where 'husbands' are feminine and others where 'wives' are masculine; dialects in which nouns overtly mark gender, but only in certain syntactic contexts; and one Romance variety (Asturian) in which it appears that grammatical gender has split into two concurrent systems. The volume will appeal to linguists from a range of backgrounds, including Romance linguistics, historical linguistics, typology, and morphosyntax, and is also of relevance to those working in sociology, gender studies, and psychology.

Morphology, and in particular word formation, has always played an important role in Romance linguistics since it was introduced in Diez's comparative Romance grammar. Recent years have witnessed a surge of interest in inflectional morphology, and current research shows a strong interest in paradigmatic analyses. This volume brings together research exploring different areas of morphology from a variety of theoretical and methodological perspectives. On an empirical basis, the theoretical assumption of the 'Autonomy of Morphology' is discussed critically. 'Data-driven' approaches carefully examine

concrete morphological phenomena in Romance languages and dialects. Topics include syncretism and allomorphy in verbs, pronouns, and articles as well as the use of specific derivational suffixes in word formation. Together, the articles in this volume provide insights into issues currently debated in Romance

morphology, appealing to scholars of morphology, Romance linguistics, and advanced students alike.
