Arguing that excluded and marginalized social groups should benefit from the growth of international higher education, Origins, Journeys and Returns reports on the development and impact of the Ford Foundation International Fellowships Program (IFP) which is designed to further social justice in some of the world's poorest, most populous, and most unequal countries. Extending opportunities for advanced education to individuals from marginalized communities has a significant impact that transcends individual beneficiaries. In 2001, the Ford Foundation began to dedicate substantial resources toward providing disadvantaged groups with postgraduate education, a process that gave hope to many. Fellows' academic success challenged presumptions about the disadvantaged and their ability to benefit from educational opportunities in prestigious international universities. Alumni have also exhibited a deep dedication to their communities, proving there is a collective return on investing in individuals. In some regions, IFP practices have modified institutional practices in universities

and other fellowship programs. Through case studies of seven countries in Asia, Africa, and Latin America, *Origins, Journeys and Returns* shows how nuanced approaches to defining the disadvantaged, along with flexible, local implementation of global program goals can actually counter "brain drain" and empower individuals to effect social change at home. *Origins, Journeys and*

Recent recommendations from a variety of sources state that reforming teacher preparation in postsecondary institutions is central in providing quality

mathematics education to all students. The Mathematics Teacher Preparation Content Workshop examined this problem by considering two central questions: What is the mathematical knowledge teachers need to know in order to teach well? How can teachers develop the mathematical knowledge they need to teach well? The Workshop activities focused on using actual acts of

teaching such as examining student work, designing tasks, or posing questions, as a medium for teacher learning. The Workshop proceedings, Knowing and Learning Mathematics for Teaching, is a collection of the papers presented, the activities, and plenary sessions that took place. Academies Press The first memoir for young readers by sports legend Kareem Abdul-Jabbar. At one time, Lew Alcindor was just another kid from New York City with all the usual problems: He struggled with fitting in, with pleasing a strict father, and with overcoming shyness that made him feel socially awkward. But with a talent for basketball, and an unmatched team of supporters,

Lew Alcindor was able to transform and to become Kareem Abdul-Jabbar. From a childhood made difficult by racism and prejudice to a record-smashing career on the basketball court as an adult, Kareem Abdul-Jabbar's life was packed with ""coaches"" who taught him right from wrong and led him on the path to greatness. His parents, coaches Jack Donahue and John Wooden, Muhammad Ali, Bruce Lee,

and many others played important roles in Abdul-Jabbar's life and sparked him to become an activist for social change and advancement. The inspiration from those around him, and his drive to find his own path in life, are highlighted in this personal and awe-inspiring journey. Written especially for young readers, Becoming Kareem chronicles

how Kareem Abdul-Jabbar become the icon and legend he is today, both on and off the court. Counting by 7s Scholastic Australia The atrocity of ragging. A town vandalized. and Mockingbird, this is an intensely moving middle grade novel about being an outsider, coping with loss, and discovering the true meaning of family. Willow Chance is a twelve-year-old genius, obsessed with nature and diagnosing medical conditions, who finds it comforting to count by 7s. It has never been easy for her to connect with anyone other than her adoptive

parents, but that hasn't kept her from leading a quietly happy life . . . until now. Suddenly Willow's world is tragically changed when her parents both die in a car crash, leaving her alone in a baffling world. The triumph of this book is that it is not a tragedy. This extraordinarily odd, but extraordinarily endearing, girl manages to push through her grief. Her journey to find a fascinatingly diverse and fully believable

surrogate family is a joy and a revelation to read. \* "Willow's story is one of renewal, and her journey of rebuilding the ties that unite people as a family will stay in readers' hearts long after the last page."—School Library Journal starred review \* "A graceful, meaningful tale featuring a cast of charming, well-rounded characters who learn sweet—but never cloying—lesso

ns about resourcefulness, community, and true resilience in the face of loss.”—Booklist starred review \* “What sets this novel apart from the average orphan-finds-a-home book is its lack of sentimentality , its truly multicultural cast (Willow describes herself as a “person of color”; Mai and Quang-ha are of mixed Vietnamese, African American, and Mexican ancestry), and its tone. . . .

Poignant.”—The Horn Book starred review “In achingly beautiful prose, Holly Goldberg Sloan has written a delightful tale of transformation that’s a celebration of life in all its wondrous, hilarious and confounding glory. Counting by 7s is a triumph.”—Maria Semple, author of *Where’d You Go, Bernadette* *Being Patient with Cookie Monster: Sesame Street Monster*

Arguably this is the biggest national book of records ever produced by any country, which in itself can be called a

record. Truly, Indians create more re-cords than anyone else on the planet. While many of the Indian record holders achieved a place in Asia Book of Records and World Record Union, more than 50 Indian re-cord holders featured in a plat-form created by the initiative of three countries that produce the India Book of Records, Vietnam Book of Records and Indonesia Book of Records to

showcase the top record holders at the global stage.
