 "Red Sugar is tantalizing and forbidden, but it is no peepshow. The poems are raw, brash, and full of pluck, yet there is tenderness and honest emotion at the core. Jan Beatty reminds us that there is 'nothing / between us and death but one inch.' She takes us to the edge of being and shows us our own quick mortal souls. Yes, there's rock music and prison sex-but do not think for a moment that this book is merely licentious. Beatty casts a broad canopy over human desire, and within the scope of experience, she finds, too, that we are innocent and sublime beings. A rich, rare treat, this *Red Sugar*." —D. A. Powell "The boldly sexual first person narratives in *Red Sugar* are absolutely riveting, artfully fleshed-out poems which generate fear for the character's safety." —ForeWord Magazine "This electric, nerve-

jangling collection revels in and sometimes rails against the glorious mess of inhabiting a body. The poems, in this, her third collection, are often raw, and full of sex, drugs and rock n' roll, but they're also shockingly soft and tender." --Pittsburgh Magazine

The publication of lovingly-crafted elegant and has been a constant aspect in the work of Jan Hendrix (1949), Dutch artist based in Mexico for three decades. This book, with a series of prints inspired by the landscape of Lanzarote (Canary Islands), distinctive accent adds to his vast production. The framework of perspectives characteristic of their frames on the universe of botany, putting off purchases in Malpais portraying metaphysical environment, ranging from the big picture to zoom in on the detail becomes emblematic abstract. Among these fantastic photographs and engravings sequences were inserted an essay by the art critic and writer Juan Manuel Bonet, which puts Hendrix's path in the tradition of great artists-travelers. From another perspective, it features a fictional Cavestany Javier Barreiro, a narrative that talks about the prospects of the landscape that inspired it. Finally, an extensive conversation with the artist addresses the various facets of his work, framed in the history of landscape and the relationship between art and science.

It is 1960 and the fighting in the French Algerian war has slowed to border conflicts and ambushes. Still, the rebels are unrelenting and so is the French Army. Although the FLN's major war efforts have ceased, they are still carrying out acts of terrorism by murdering and assassinating members of the French military as well as Algerian Europeans. It appears there is no viable solution to the war and the idea of attaining a peaceful resolution seems like a hopeless dream. French Army Lieutenant Caitlan Dugas, who has already served one tour in the war-torn country, believes the situation is improving when she reenlists and returns to Algiers to be closer to her lover, Sergeant Leo Durant. But when she and Leo are assigned to a special task force organized to confront the radical terrorists of the FLN who know no bounds with their brutal attacks, both soon realize the depths of their fighting spirits as they must battle against the horrors of terrorism. In this historical novel, a dedicated French Army officer who returns to war-torn Algiers to be closer to her lover collides with a destiny she never imagined.

From the creator of the popular rock 'n' roll true crime podcast, *DISGRACELAND* comes an off-kilter, hysterical, at times macabre book of stories from the highly entertaining underbelly of music history. You may know Jerry Lee Lewis married his thirteen-year-old cousin but did you know he shot his bass player in the chest with a shotgun or that a couple of his wives died under extremely mysterious circumstances? Or that Sam Cooke was shot dead in a seedy motel after barging into the manager's office naked to attack her? Maybe not. Would it change your view of him if you knew that, or would your love for his music triumph? Real rock stars do truly insane things and invite truly insane things to happen to them; murder, drug trafficking, rape, cannibalism and the occult. We allow this behavior. We are complicit because a rock star behaving badly is what's expected. It's baked into the cake. Deep down, way down, past all of our self-righteous notions of justice and right and wrong, when it comes down to it, we want

our rock stars to be bad. We know the music industry is full of demons, ones that drove Elvis Presley, Phil Spector, Sid Vicious and that consumed the Norwegian Black Metal scene. We want to believe in the myths because they're so damn entertaining. DISGRACELAND is a collection of the best of these stories about some of the music world's most beloved stars and their crimes. It will mix all-new, untold stories with expanded stories from the first two seasons of the Disgraceland podcast. Using figures we already recognize, DISGRACELAND shines a light into the dark corners of their fame revealing the fine line that separates heroes and villains as well as the danger Americans seek out in their news cycles, tabloids, reality shows and soap operas. At the center of this collection of stories is the ever-fascinating music industry--a glittery stage populated by gangsters, drug dealers, pimps, groupies with violence, scandal and pure unadulterated rock 'n' roll entertainment.

In an expansive study Johannes Brahms emerges from Jan Swafford's book is not a bearded eminence but rather an assemblage of contradictions. He grew up in grinding poverty and as a teenager was forced to play the piano in brothels. Recognized by his teachers as a stupendous talent, Robert Schumann proclaimed Brahms at only twenty-years-old to be the saviour of German music. Brahms spent the rest of his life living up to the that prophecy. He experienced triumphs few artists have enjoyed in their lifetime, yet lived with a relentless loneliness and a growing fatalism about the future of music and the world.

Jan Hendrix is a Dutch-born, Mexico-based contemporary artist. His work is all about observation and analysis; nature and its different ways of representing and telling extended stories, often in a non-linear narrative. Based on an exhibition at Kew Gardens, this book is a visual report of Hendrix's multiple visits to the Kamay Botany Bay Area of New South Wales, Australia, made over a 20-year period. Beautiful and thought-provoking works convey his response to the fragile, changing landscape, under constant threat of fire and destruction. His work also draws on first collections of plants at Kamay Botany Bay documented by botanists Joseph Banks, Daniel Solander and Sydney Parkinson as part of the HMS Endeavour expedition in 1770. Supporting texts by Art Historian Dawn Ades, CEO of the Bundanon Trust Deborah Ely, and filmmaker Michael Leggett contextualise the work of the

artist. With a foreword by Kew Director Richard Deverell.

When Mark, an American soldier serving in Germany in the early 1950s, meets Lauren, a young German girl, their lives change forever. But love is never easy, and for these two it may well be impossible. In a world still reeling from the horrors of war and genocide, the budding love between a Jewish soldier and a German Catholic girl is controversial and dangerous. It is a time in history that demands the same dedication and focus on duty as in the war years. Both of the lovers are pressured from all sides, and each feels the impossibility of their love—but neither can deny or forget it. Mark is faced with military duty, a possible court martial, and a threatening sociopath. Lauren is expected to play the role of the dutiful German daughter who follows the path dictated by her father. In addition to her obligations to her father, she is expected to focus only on school, work, her church, and her duty to country. Their very different backgrounds stand as obstacles they can't disregard. Neither is so naïve as to ignore the considerable cultural and societal pressure they face. But the heart does not always listen to logic, and soon they are irresistibly drawn together—come what may. Despite all the many forces they face, can they find the strength to stay together in a world that propels them apart?

A hippie (or hippy) is a member of a liberal counterculture, originally a youth movement that started in the United States and the United Kingdom during the mid-1960s and spread to other countries around the world. The word hippie came from hipster and was initially used to describe beatniks who had moved into New York City's Greenwich Village and San Francisco's Haight-Ashbury district. The term hippie was first popularized in San Francisco by Herb Caen, who was a journalist for the San Francisco Chronicle. The origins of the terms hip and hep are uncertain, although by the 1940s both had become part of African American jive slang and meant "sophisticated; currently fashionable; fully up-to-date". The Beats adopted the term hip, and early hippies inherited the language and countercultural values of the Beat Generation. Hippies created their own communities, listened to psychedelic music, embraced the sexual revolution, and used drugs such as marijuana, LSD, peyote and psilocybin mushrooms to explore altered states of consciousness.
