A Place Called Vatmaar LAPA Uitgewers
The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his

triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined

to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

Essential topics include assessment; building core competencies, such as fluency, comprehension, and vocabulary; and working with struggling adolescent English language learners.

In the wild night hours, or during the heat of the day - whenever man's thoughts whirl feverishly - then truth and fantasy, the past and the future, life and death are indiscriminately mingled on Toorberg, home of the Moolman family. So the magistrate is to learn as he investigates the strange circumstances of the death of little Noah, child of grief, who was not entirely of this world. Every day the case becomes more complex,

until it challenges the very foundations of the law. It seems as if the magistrate will have to judge an entire dynasty, both the living and the dead. Everyone's guilt has to be affirmed, or denied, and this means he will have to rip open the lives of all. The Moolmans are a tribe who have long since learned how to deal with their own. Parents cut children out of their lives, shunt them aside to live as stepchildren, scrag-ends of the clan, or as city-dwellers whose names are never uttered. The Moolmans cannot forgive; not when their tribal blood is betrayed.

"Shocking findings show that South

African learners are consistently underachieving, counting not only amongst the worst in the world, but often amongst the worst in Africa. Education policy expert Graeme Bloch states that 60-80% of our schools are dysfunctional. They produce barely literate and numerate learners and Bloch believes the country is headed for a national education crisis. He identifies the toxic mix of factors that are causing this crisis, taking government and teachers to task for not performing as they should and highlighting the socio-economic challenges that many learners face. But Bloch doesn't leave it at that - he offers solutions to turn the situation around. He gives anecdotal evidence of several schools and individual teachers who are getting it right, leaving the

reader with hope for the future. This book will speak to parents, teachers and anyone concerned about the future of the country. It is a powerful call to action"--Publisher's website.

The Book of Squares by Fibonacci is a

gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional

mathematicians and amateurs who have always been intrigued by the lure of our number system.
