TOWNSEND TAPIA

Gabriel's Rapture Greenwood Publishing Group
 Imitation guides the behaviour of a range of species. Scientific advances in the study of imitation at multiple levels from neurons to behaviour have far-reaching implications for cognitive science, neuroscience, and evolutionary and developmental psychology. This volume, first published in 2002, provides a summary of the research on imitation in both Europe and America, including work on infants, adults, and nonhuman primates, with speculations about robotics. A special feature of the book is that it provides a concrete instance of the links between developmental psychology, neuroscience, and cognitive science. It showcases how an interdisciplinary approach to imitation can illuminate long-standing problems in the brain sciences, including consciousness, self, perception-action coding, theory of mind, and intersubjectivity. The book addresses what it means to be human and how we get that way.

Prevent, Repent, Reform, Revenge is a study of the aims that people intend to achieve by the sanctions and treatments they recommend for wrongdoers. The book is designed to answer two main questions: What kind of analytical scheme can profitably reveal the nature of people's reasoning about the aims of sanctions they propose for perpetrators of crimes and misdeeds? In the aims that people express what changes in overt moral reasoning patterns appear between later childhood and the early adult years? The authors conducted interviews with 136 youths between the ages of 9 and 21 to find out what sanctions and aims they felt were appropriate in three cases of wrongdoing. The resulting information provides an important insight into adolescent moral development.

"The colonial good life : a commentary on Andre Joyeux's vision of French Indochina' reproduces and analyzes a collection of crucial primary documents from the early twentieth-century. These simple yet rich visual sources provide us with a clever insight into the nature of the colonial order of things. Joyeux was a French artist who served in the colonial service as an art teacher and school administrator. Living primarily in and around Saigon, he captured many aspects of daily life in the French colony in a series of humorous, critical, and, at times, somber cartoons. Taking on individuals such as corrupt civil servants, decadent plantation owners, and scheming Vietnamese housekeepers, his pen and ink drawings spared few, yet he never lost his humanity and empathy. As a member of the community he studied, Joyeux offers the reader informed analysis of French colonial society from the inside. In addition to translating the cartoon captions, Vann and Montague provide an introductory essay and explications of each image." -- book cover.

« Il a réinventé le polar. Ni plus ni moins... Les suites sont souvent décevantes; celle-ci fait exception. La confrontation entre Harry Bosch et le Poète est un sommet d'intelligence.» François Busnel - LireAlors qu'il enquête sur le décès de l'ex-profilier du FBI Terry McCaleb, l'ancien inspecteur des Vols et Homicides Harry Bosch en vient vite à penser que Terry n'est pas mort de sa belle mort, mais a bel et bien été assassiné par un meurtrier particulièrement retors. Les faits et les détails concordants sont très troublants, mais... aussi extravagant que cela lui paraisse, Bosch est amené à penser que l'auteur du meurtre est l'ancien grand patron du FBI, Robert Backus, dit « Le Poète ». Sauf que... le Poète est mort. À force de chercher, Bosch découvre une piste qui le remet en contact avec le FBI. Dans le même temps, l'agent du FBI Rachel Walling, ancienne protégée de Backus tout comme l'était McCaleb, et qui a été exilée dans le Dakota du Sud suite au rôle qu'elle a joué dans l'enquête sur le Poète, reçoit l'appel qu'elle redoutait depuis toujours : oui, le Poète est toujours vivant. Et il ne l'a pas oubliée.C'est donc contre leurs hiérarchies respectives que Walling et

Bosch joignent leurs forces et, de Las Vegas au désert du Nevada en passant par les bas-fonds de Los Angeles, ils traquent alors un Poète qui n'a rien perdu ni de sa superbe, ni de son amour de la mort donnée avec la plus grande jouissance.

Over the past two decades, new technologies, changing viewer practices, and the proliferation of genres and channels has transformed American television. One of the most notable impacts of these shifts is the emergence of highly complex and elaborate forms of serial narrative, resulting in a robust period of formal experimentation and risky programming rarely seen in a medium that is typically viewed as formulaic and convention bound. Complex TV offers a sustained analysis of the poetics of television narrative, focusing on how storytelling has changed in recent years and how viewers make sense of these innovations. Through close analyses of key programs, including *The Wire*, *Lost*, *Breaking Bad*, *The Sopranos*, *Veronica Mars*, *Curb Your Enthusiasm*, and *Mad Men* the book traces the emergence of this narrative mode, focusing on issues such as viewer comprehension, transmedia storytelling, serial authorship, character change, and cultural evaluation. Developing a television-specific set of narrative theories, Complex TV argues that television is the most vital and important storytelling medium of our time.

This book studies the problem of acquaintance against the background of a more general theory of intentionality. Much of the relevant background is laid out in the book I wrote with Ronald McIntyre, *Husserl and Intentionality* (1982). However, since this book is not focussed on Husserl, I shall not assume the reader's familiarity with the prior book or with Husserl's philosophy. (I have sometimes referred to this book-in progress as *Acquaintance*; I've rounded out the title a bit.) of The initial

inspiration for this work, in the 1970's, was a confluence ideas from the logic of perception and the logic of demonstratives, ideas in which I found phenomenological inspiration. These included Jaakko Hintikka's notion of perceptual individuation, Romane Clark's account of a demonstrative element in perception, David Kaplan's analysis of the meaning (character and content) of demonstratives, and Hector-Neri Castaneda's notion of quasi-indicators. I would later add to the list John Perry's appraisal of belief reports involving indexicals (extending Castaneda's ideas) and Hilary Putnam's Twin Earth thought-experiments (complementing Clark's and Kaplan's ideas of the same vintage). I want to thank Chuck Dement and Ronald McIntyre for their responses to the first draft. For many discussions of issues addressed in the book I thank David Blinder, Hubert Dreyfus, Dagfinn Føllesdal, Jaakko Hintikka, David Kaplan, Ronald McIntyre, Izchak Miller, Esa Saarinen, John Searle, and Peter Woodruff. I have benefited also from colleagues and students too numerous to name but deserving my thanks nonetheless. Philosophy is a surprisingly communal affair.

The author establishes a new foundation for the use and value of clinical empathy that is based on a distinction between treatment and healing, and a model for using psychotherapy as a component of an organized system of care: focused, attuned to the patient's presenting motive, and consistent with our understanding of the relationship between mind and brain.

Author Raja Halwani discusses how virtue ethics illuminates the three central areas of our lives -- care, love, and sex -- which are often considered to be crucial to a well-lived life. Halwani concludes that virtue ethics allows for those sexual lifestyles that are deemed by traditional morality to be wrong -- promiscuity, open relationships, and sex work -- which boldly counters the conservative viewpoint of many virtue ethicists. This argument about the relationship between romantic love and virtue also examines the works of other philosophers.
